

Board Report

Jim Seward, District Technology Coordinator
July 2021

Phone System

The phone system has been updated and centralized. Next step is to order new phones and replace handsets throughout the district.

1-1 Program

We are again offering a 1-1 solution for our students. The Tech Team is working diligently to get all devices ready for the next school year.

Interactive Displays

The interactive displays are currently delayed, due to shipping issues around the world. I am working to define a date and have my installers ready to go!!

Wireless Upgrade

We have received updated financial information. We will be placing the order soon. This will be a project that will need to be completed over fall break, or possibly Christmas break.

Summer Work

The extremely busy time of year continues to roll on. We are working on various projects to get our district ready for the next school year!
