RE: Jamf Management Software

With the increased use of Apple iOS and Mac devices in our district, we have decided to look into using management software. Both teachers and students use these devices but we have no way to use them on the secure network or track them if the device is lost or stolen like with Windows or Chrome devices. Jamf can proactively manage the entire lifecycle of Apple devices. This includes deploying and maintaining software, responding to security threats, distributing settings, and analyzing inventory data. I ask for approval to purchase this software so it can allow us more security and control over the previous mentioned Apple devices. We have nearly 3,000 Apple devices that can be managed and it will cost us \$16,510.50. This is a one year license. The quote is attached and it includes a \$500 onboarding fee that will provide educational services to our team.

If you have any questions feel free to contact me at 502.869.8040 or email me at kevin.fugate@bullitt.kyschoos.us. Thank you!
