BACKGROUND INFORMATION:

In July 2021, it was found that there was a crack that had appeared in the WCHS Gym Upper Bleacher concrete. RossTarrant Architects were alerted to have a structural engineer make an initial assessment. Since the identification of the issue, continuous research has been made by both RossTarrant and Charles Haynes with Structural Design Group. It has been determined that the best option is to repair and reinforce the existing structure such that it can support the current point loads of the retractable bleachers.
