

October Teacher of the Month

[Greg Taylor](#) is the lead teacher at the ATC and has been a resource teacher for new teachers. Mr. Taylor works hard to provide the instruction to his students on the latest software for Computer Aided Drafting and Architecture that is being used in industry. Mr. Taylor and his classes have designed several house plans and civil engineering plans for projects such as the playground beside Five Star and Emergency Evacuation routes for the ATC. One of his former students who works at the engineering firm helped with the design and planning of the new facilities at the high school. Mr. Taylor and his classes have created parts in the 3D printer for local manufacturing companies. Mr. Taylor has a high pass rate on the industry certifications each year and is offering dual credit. Mr. Taylor gives individualized instruction to students who want to pursue a career in mechanical, civil, or architectural engineering. Mr. Taylor has students placed for Co-op at civil engineering companies. Mr. Taylor is truly deserving of this recognition.
