

Board Report

Jim Seward, District Technology Coordinator
November 2021

Interactive Displays

The new displays are fantastic and loved by our teaching staff. We have completed our first round of training. I can tell the staff were engaged and enthusiastic about the boards, based on questions to the trainers.

Virtual Reality - Augmented Reality

I am researching some new technologies to use in our district. The product is called zSpace. We have had the demo. Truly an awesome product. We have requested a loaner device to demo with staff and students.

Pixellot

I am working with the Athletic Director on installing a stationary camera to work with live streaming of our athletic events at Ben Flora Gymnasium.
