Scope

Provide a Complete Narrative of the Proposed Project

This project consists of the first phase of renovations to approximately 185,000 SF of existing building donated to the District from a privat source (it is anticipated tere will be one or more additional phases). The project will create a 1,000 student academy which will have lab spaces

developed around career pathways and will be based on a Project Based Learning schedule/environment with a lot of open, collaborative learning spaces. the entire building will be upgraded, some areas more so thanb others, with full food service and PE spaces being created. many of the existing rooms can be repurposed while other areas will have to be created as required to meet the architectural program requirement. There will be some upgrades to the buildng as it is currently 20 years old and some systems are in need of replacement. There will also be some minor site work involved for the site which is approximately 21 acres. The existing building will recieve new rooftop HVAC units and roof. The original project scope within the approved and revised BG-1 is for this prject was scaled back during the design and bidding process in order to keep within the boudget by using a multi-phase approach. Boone County is now going to be implementing additional upgrades (i.e. LED lighting, data and technolgy) and finishing the remaining areas (Childrens INC, Robotic Storage, Fab Lab, Makerspace, additional kitchen equipment, etc.) since othe Districts hae brought additional funding.
