

Board Report

Jim Seward, District Technology Coordinator
July 2022

Staffing

I am pleased to report that Andrew Burkhardt has joined the Tech Team. Andrew is replacing Alex Thompson. Andrew has many years of experience as a small business owner in the technology industry.

I am still interviewing to replace Brian's position.

Phone System

The next step in our phone system is happening this summer. Our Tech Team will be replacing the handsets in all offices/classrooms/other over the summer. We are currently working on GES. We will be moving to BMHS as soon as we can, due to ongoing construction.

Construction

We continue to support the construction project with moving of wireless, adding new connectivity and protecting/moving technology as needed. We are looking forward to getting the new office at GES up and running. This includes new wiring, new phones, new cameras, and new secure entrance.

Summer Work

The extremely busy time of year continues to roll on. We are working on various projects to get our district ready for the next school year!
