

Board Report

Jim Seward, Director of Technology
September 2022

Technology Activity Report

The annual Technology Activity Report has been submitted to Kentucky Department of Education. This report requires school districts to report technology expenses for the prior fiscal year. The state data is then presented to the legislature for future technology funding needs. The submission of this report is also the first step in receiving our first KETS Offer of Assistance.

Digital Readiness Report

I am working Mrs. Rehtin to submit the annual Digital Readiness Report. This report is submitted to KDE to provide information regarding the status of the technology in the district. The data collected includes the number of devices in the district, the number of technology personnel, technology support provided, and district network connectivity. After KDE approves the report, it can be viewed at:

http://applications.education.ky.gov/trs_reports/.

Digital Signage

A new display has been added to Ben Flora. This is currently a dual purpose display. Digital signage for non-instruction and digital display for classroom instruction.

Another display will be added to the vestibule at GES when furniture has been placed.

The current display at BHS is still installed and working. Mrs. Gibson is the primary force behind keeping the displays updated.
