

Board Report

Jim Seward, Director of Technology
October 2022

Service Learning Aides

The Technology Department is blessed to now have two students working with the Technology Department. The students are learning how to service issues with staff and students. I am working to acquire a software solution that will help the students get an industry certification in the technology field.

School Resource Office

I have been working closely with Mrs. Middleton to gather the necessary technology for the needs of our incoming SRO. Everything has been ordered.

Digital Signage

All digital signage is installed. Presentations have been created. Candace will be the primary person to update the displays, as needed.
