

Board Report

Jim Seward, District Technology Coordinator
December 2022

Digital Displays

We are in the process of updating the back-end equipment/software on our three digital displays. I created the signage and Candace keeps the displays updated with content.

Monthly Support

We have seen an uptick in the amount of damage being reported by students. Water damage, cracked screens, power cords etc. We are fortunate enough to have a supply of loaner devices to cover these issues.

Construction

We are continuing to work with construction crews. There is a planned power outage at BMHS on December 26/27, 2022. With this outage, all technology services will be down, in the district, during that time frame.
