- ✓ **Acoustic and optical signals**, located at the top of the pillars, provide simultaneous status and alarm indications.
- ✓ **OPENGATE features a near zero rate of nuisance alarms**, and operates with **very high transit flow**, without the need for the divestiture of non-threat items.
- ✓ It is **portable, elegant, easy to set up and ready to use with no installation required**, including the setting and assembly of mechanical and electrical parts.
- ✓ Its structure makes it **suitable for indoor and outdoor operations**, even in conditions of exposure to rain and sunlight, in all environmental conditions that are compatible with security screening operations.
- ✓ The **extreme portability allows quick relocation of the gate**, offering the most suitable solution for places where, for safety reasons, the checkpoint must be moved from obstructions after use.
