

Board Report

Jim Seward, Director of Technology

May 2023

End-of-year

We are collecting all student and staff devices before the end of the year. We are also imaging new computers to be available for summer school.

New Employees

We have hired Madison Jones and Skyler Benitez as our summer student technicians (seasonal positions). The students will be working closely with our team for the months of June and July 2023. They will be an integral part of getting our district ready for the next school year.

Summer

The Tech Team will be extremely busy this summer. New staff devices at BMHS, imaging computers and the many other tasks that come with summer break. And we cannot forget the construction projects, to name a few.
