

# The KETS Timeline (from 1992-2023)

*“Kentucky K-12 has been and continues to be the pioneer and national leader in most aspects of education technology since 1992”*

## 2023

### **Student Technology Leadership Program (STLP) - Record Setting STLP State Championship Growth**

The 2023 STLP journey began with over 1800 STLP school team projects and more than 60,000 KY K-12 STLP students competing in the numerous, yet expanding STLP categories. Participation in the State Championship broke all previous records with 114 school districts (10% increase), 488 schools (20% increase), 13,256 students (63% increase) attending and participating LIVE! The 2023 state championship event also saw the first ever event using every available square foot for student demonstrations at the new Central Bank Center and Rupp Arena in Lexington, where a record number of school buses were ushered in to drop students off at the championship to compete. The STLP State Championship event is proving to push the scale and capacity as the largest student facing event in the state of Kentucky.

### **2023 Making IT Happen Award**

KETS leaders have been recognized for multiple years with the International Society for Technology in Education (ISTE) award honoring outstanding educators and leaders who demonstrate extraordinary commitment, leadership, courage and persistence in improving digital learning opportunities for students - (2009, 2011-2013, 2015, 2016, 2018, 2019, 2020 and 2023).

### **MUNIS Upgrade**

Kentucky School District Finance Officers completed a significant security project to improve overall security and user experience of the MUNIS application. One less password for the district Chief Financial Officer (CFO) to remember results in a better, more secure password by applying Multi Factor Authentication (MFA), consistent password strength, and Azure AD monitoring of account threats. This is an overall move into the Connected User Experience.

### **Enhanced Identity Security Initiative**

The education environment, including K12, continues to be the most targeted by cybercriminals, far outpacing other industries such as healthcare, banking and manufacturing. As a statewide response to these threats in Kentucky, all public school districts were provided the training, licensing, and implementation assistance to ensure that staff and teacher access to online technology resources is protected with multiple layers of enhanced account security functionality.

### **Statewide implementation of Campus Analytics Tools**

Partnered with Infinite Campus, using ESSER funding, to enhance tools readily available to teachers and school leaders for data driven decision making. Enhanced analytics to support Early Warning, Assessment, Behavior and Attendance visualizations along with a personalized dashboard for monitoring key data.

## **2022**

### **Continuation of Crucial EdTech Services Right After Historical Flooding of 2022**

Between July 25th and July 30th, 2022, unprecedented rainfall brought severe and historic flooding to parts of Southeastern Kentucky and severely impacted multiple school districts with some school buildings being completely submerged. Loss of power and other wire-delivered services lasted for days and sometimes weeks. During the flooding and afterwards, impacted districts remained with quality Internet services and cloud-based financial management and school information services to support ongoing payroll and student support/learning services.

### **One of First Five States to Implement Generate**

Generate is the federal system for EDFacts reporting. KDE is a national pioneer for implementation and development of the new state-driven and managed solution that improves data quality, automates reporting, and standardizes and streamlines data processes.

### **Preparing/Building for the Future**

During the COVID years, KDE and Kentucky school districts made record improvements to the technology components and services supporting the learning experience from the classroom, home or in a hybrid model. We more than doubled the Enterprise Internet capacity from 80 to 200 Gbps and increased district Internet connections for 145 districts. We improved the service to district firewalls to support four-hour same day replacement, replaced aging Internet access equipment at school districts, and improved Internet safety for students, teachers and administrators while they worked remotely. We also launched a comprehensive effort to further improve Internet security/safety including Identity protection measures for every student, teacher, and administrator. These improvements will support growth, safety and improve the overall digital experience.

### **Largest Digital Learning Coach Summit Conducted**

OET, in partnership with Kentucky Education Television (KET), held the annual Digital Learning Coach Summit. Attendance and participation were outstanding with over 250 leaders connecting and sharing.

### **Kentucky K-12 EdTech Not Only Survives but Thrives Throughout Covid-19 Pandemic**

KDE staff and the KY K-12 environment remained uniquely poised to quickly pivot to virtual meetings, distance digital learning, and virtual cloud operations services as we successfully navigated through a second one of a kind school year. KY K-12 is “the” pioneer and “the” national leader in most aspects of education technology so KY K-12 is much better positioned and prepared for telecommuting, virtual operations, virtual resources, virtual meetings and cloud based services than the other 49 states since we’ve been doing all of these for over a decade. These past few years have put an unprecedented load on all our systems and major services, yet we thrived and did so while continuing to implement new projects, upgrade services and provide connectivity and availability with 99.98% uptime.

### **Updated “The People Side of K-12 EdTech” Study**

Presented major updates to the original study to account for the new proposed “People Side Formula”. This update also includes new considerations for education technology staffing and role strategies, as well as considerations for time, talents and tools.

### **Kentucky Educator Credentials System (KECS) Launch**

In early May 2022, KDE's Education Professional Standards Board (EPSB) support organization transitioned to KECS, a new teacher/principal licensing system. Kentucky grants or renews ~34,000 professional teaching and administrative licenses every year. With RANDA Solution's cloud-based workflow system, the effort required to apply or renew an application has been cut in half, the process streamlined, and several home-grown, in-house written applications were retired and replaced with a modern, cloud-based solution. 171 Superintendents, ~200 District HR Reps, and ~35 college personnel, along with ~16 KDE staff were trained or given access to training and are now using the system to process renewals and new license requests, with thousands of teachers and principals using the system to renew or apply for new licenses.

### **Student Technology Leadership Program (STLP) State Championship Reconvenes In-person with over 14,000 in Attendance**

The Kentucky STLP State Championship was hosted on April 20, 2022. This was the first large-scale event at the new Central Bank Center with every area of the facility being maximized for student demonstrations of learning through technology infused project-based learning. For the first time in the STLP state championship history, the Kentucky Board of Education and the KDE Executive Leadership Team were on-site to experience this annual event.

### **Largest and Most Successful Kentucky K-12 Online, High-Stakes Assessment Conducted Three Years in a Row**

KY had its third exceptional year with our K-12 Online Summative Testing initiative, setting new records by charging our way through yet another year by completing the largest testing cycle to date with stellar results returned exceptionally fast to teachers and school leaders. 1,647,395 tests were completed in the Spring 2022 test window by students in 3<sup>rd</sup> through 11<sup>th</sup> grades across all 171 KY school districts with near zero issues. This includes additional online testing sessions from CTE, vocational and ACT. No other state has come close to experiencing this level of success with deploying online testing for their K-12 students to this scale.

### **Single Sign-On (SSO) with Kentucky Virtual Library**

For the first time in state history the KDE provided access to the Kentucky Virtual Library (KyVL) through a safer, more secure login for students and teachers with Single Sign-On (SSO) technologies for improved ease of access to the KyVL resource library.

### **Entire Kentucky K-12 Community Recognized for Heroic Efforts**

The 2022 Stilwell Honorary Meritorious Service Medal was awarded to KY K-12 education technology district team members and the Office of Education Technology team members in KDE for going far above and beyond to help through the pandemic as technologies were thrust into the spotlight to keep school and learning services operating at the highest possible levels. The honorary medal reads: "In Recognition of Heroic Efforts March 2020 to March 2022--Presented By The Office of Education Technology, Kentucky Department of Education"

### **Launched Kentucky's First Comprehensive K-12 State Plan for Computer Science Education**

The Kentucky Department of Education (KDE) continues ongoing support for strong computer science education with the creation of a dedicated K-12 Computer Science Program Manager within the Office of Education Technology, the annual computer science growth report and the development of a, first of its kind, Comprehensive K-12 State Plan for Computer Science Education.

### **Continuation of Crucial EdTech Services Right After Tornadoes of 2021**

In the six months prior to the pandemic, throughout the pandemic and with the recent western Kentucky tornadoes, all KY K-12 cloud based Internet services (financial management services through MUNIS, school information management services through Infinite Campus, e-mail services through Microsoft 365 and Google, etc.) have been up and available to all 171 districts 99.999% of the time. Since 1995, Kentucky is the only state in the nation that has a KY K-12 product standard for both the Internet and financial management system services for all its districts. Being the national leader in cloud services is an edge that KY K-12 has on the other 49 states, which comes in very handy both in normal conditions and during recent disaster recovery situations. This provided the ability for all districts to immediately continue payroll services during a disaster by going to a neighboring district or any location with Internet access.

### **Internet Access Beyond the School Campus Expanded**

At no other time has more progress and funding been available for Internet access beyond the school campus for KY K-12 students than the past two years. Ninety-eight percent had enough bandwidth available to regularly do their schoolwork beyond the school campus—two percent still don't. Similar progress has also been achieved with modernized Wi-Fi access in the buildings and other school campus locations (e.g., a school's parking lots).

### **Equity Dashboard Provides Improved Data Interaction and Visualization inside Student Information System**

The new Equity Dashboard suite provides visualizations of under- or over-representation of various demographic groups on several indicators and is designed to offer a “big picture” look to help schools and districts identify areas needing further attention. OET leveraged the existing Infinite Campus contract to build out the dashboard versus building a brand-new data system.

## **2021**

### **Revised Academic Standards for Technology**

Kentucky again reaffirms the value of education technology to transform learning experiences through the adoption of revised Kentucky Academic Standards (KAS) for Technology. The adoption of 704 KAR 8:090 by the KY Board of Education was also approved by the legislature with an effective date of March 2, 2021. The KAS for Technology are required standards as they define the competencies that are tied to minimum graduation requirements, where all Kentucky graduates must demonstrate performance-based competencies in technology.

### **First Academic Standards for Library Media**

For the first time ever, the KY Board of Education adopted and the legislature approved the Kentucky Academic Standards (KAS) for Library Media learning, 704 KAR 8:100, with an effective date of May 4, 2021. This marks the first time KAS for Library Media have been developed to further define the required learning standards when students are engaged through library media related learning. These standards are comprehensive and cross curricular as they fit into learning inside of other content areas. These new learning standards fit tightly into every school as every public school in Kentucky is required to have a library media center with a certified school library media leader.

### **The Year of 100% Virtual STLP**

STLP responds to COVID-19 pandemic by shifting to an all digital format for an entire year. Thanks to years of foundational development, STLP was poised to take full advantage of district digital learning leadership, 1:1 initiatives, and KETS resources to overcome a pandemic to still provide relevant opportunities for students to participate. 100% of all STLP student-focused events/activities were successfully conducted virtually.

### **Digital Learning Coaches Exceed 550**

A critical component of any successful digital learning initiative is the support provided by Digital Learning Coaches (DLC). Districts with these support structures in place are ready to collaboratively support digital learning strategies and workflows across grade levels, content areas and job classifications. Through the pandemic, districts realized the importance of these support roles, through the “People Side of K-12 EdTech in KY” and the network grew to exceed 550 DLCs -- a 285% growth.

### **Emergency Virtual Attendance Waiver Approved**

The Kentucky Board of Education (KBE) officially approved a waiver of 702 KAR 7:125, Pupil Attendance for full time enrolled virtual students, on May 18, 2021. Not only did this provide necessary flexibility for districts seeking to provide virtual learning options for the 2021-2022 school year but it officially reaffirmed the value of virtual learning and provided some necessary measures and assurances detailing the anatomy of high-quality online and virtual schools, programs and academies.

### **Kentucky Becomes First and Only State to Provide Internet Safety and Protections for 100% of Schools to Meet New Federal Requirements**

With the launch of new Emergency Connectivity federal funds for school districts (ECF), for the first time, the Federal Communications Commission (FCC) details a new requirement for CIPA (Children’s Internet Protection Act) relating to every district-owned student device. This new requirement states that the CIPA technology protection measure applies to all student computers no matter where the student is located (anywhere, anytime, and always on). To date, almost 700K school and district devices are now loaded with a modern internet safety and protection tool and the ability to monitor and manage Internet usage for every district device. Kentucky K-12 becomes the first state nationally to have every school implement this new federal requirement for every student.

### **First KySTE KY K-12 CIO Virtual Summit Hosted**

OET, in conjunction with our Kentucky Society for Technology in Education (KySTE) partnership, held our first 100% virtual CIO Summit on April 20 continuing our annual summit for the 8th year. Attendance and participation were outstanding with 87% of our districts (140 unique districts along with KSB and KSD) joining virtually to engage in facilitator-led conversation on upcoming edtech topics/strategies/approaches to gain the experience, knowledge and wisdom of our chief information officers.

### **Campus Learning Available to All KY Schools**

Expands tools available to align Kentucky Academic Standards to curriculum and enhance communication tools available to all students, remote and in-person. Provides interoperability solution to districts to link Infinite Campus to other Learning Management Systems, including Google Classroom. Other tools include: Curriculum Planner, Unit/Lesson Plan/Assignment Library, Quick Assessments, Standards Portfolio and Progress Monitor and Score analysis tools. CARES Act funding utilized to offer a premium product to all schools and districts beginning with the 2020-2021 school year.

## **2020**

### **Kentucky Conducts the Largest and Most Successful K-12 Online Assessment in Kentucky History**

KY once again broke new ground completing by far the most successful and largest “Field Test” to date of the KY K-12 online summative testing initiative and distinguishing KY from the nearby states that had failed. The numbers speak for themselves with 771,767 tests completed by

390,373 students across 3<sup>rd</sup>-8<sup>th</sup> and 10<sup>th</sup>-11<sup>th</sup> grades, and 172 KY school districts with near zero issues. No other state has come close to experiencing this level of success with deploying online testing for their K-12 students.

### **All KY K-12 Schools Quickly Pivot to NTI**

In response to a global pandemic and due to KY's nation leading digital readiness, 100% of Kentucky public schools quickly pivoted to implement plans for continuation of learning through the statewide Non-Traditional Instructional (NTI) time program with heavy digital connectedness and technology enabled services, tied to digital, remote and distance learning. Digital learning and collaboration saw new heights in KY K-12, due to our nation leading digital readiness. Had we not been putting the right things in place for the past 25 years, there would have been no way that we could have pivoted to nearly 100% digital experience options in all 172 school districts overnight. KY K-12 is "the" pioneer and "the" national leader in most aspects of education technology. Therefore, KY K-12 is in a much better position and prepared for online, digital, distance, virtual and remote teaching and learning due to more cloud based services than the other 49 states. Because of NTI, KY was able to not only keep going but finish the school year versus shutting down way early like other states.

### **First Totally Virtual KBE Meeting**

The Kentucky Board of Education (KBE), in an effort to practice social distancing, held its first ever virtual meeting using Microsoft Teams where every KDE staff member, KBE member and other presenters were physically at different locations. It was streamed live and accessible to the public on the Kentucky Department of Education's YouTube channel to meet all requirements of KY's open meetings law. Kentucky's successful implementation is either the first or one of the nation's first 100% virtual board meetings complying with all provisions of open meetings law. Our model quickly set an example that KY school districts, other KY state agencies and other states across the nation recognized and requested our assistance in replicating for their virtual board meeting needs.

### **STLP State Championship Quickly Pivots to 100% Virtual Competition Instead of Cancelling**

In response to the global pandemic, STLP quickly pivoted to host a 100% virtual state championship experience. Student participation was higher than expected and demonstrations were judged by virtual panels and countless volunteers. The live broadcast awards show had thousands of viewers with a record social reach. The journey to KY K-12 STLP State Championship began with 1800 STLP school team projects and close to 60,000 KY K-12 STLP students competing in November and December at our 9 regional competitions throughout Kentucky.

### **First Statewide Staff Password Requirements**

First in the nation to implement a uniform strong password baseline for 100% of staff accounts within all K-12 districts and the Kentucky Department of Education.

### **KDE First in KY State Government and One of the First In the Nation to Quickly Pivot to a 100% Telework/Telecommuting Service**

KDE staff and all 172 school districts made the fast mass quality transition to telecommuting, virtual meetings, distance digital learning, and virtual cloud operations services. However, had we not been putting the right things in place for the past 25 years, there would have been no way that we could have pivoted to nearly 100% virtual across an entire Department of Education and for all 172 school districts overnight. KY K-12 is "the" pioneer and "the" national leader in most aspects of education technology so KY K-12 is in a much better position and prepared in

telecommuting, virtual operations, virtual resources, virtual meetings and cloud based services than the other 49 states since we've been doing all of these for over a decade. All 172 of our KY K-12 school districts are already connected by high speed, high quality, reliable fibered Internet service and all schools already have dense Wi-Fi within each school building. KY was the first state to have all of this in place for every school district throughout a state. All this uniquely positioned KDE staff and our KY K-12 school districts to quickly transition and continue to provide services and instruction in light of the COVID-19 pandemic all while simultaneously further fortifying our already rock solid security posture.

### **KY K-12 School Report Card (SRC) is Recognized One of the Nation's Best**

Kentucky's School Report Card provides students, parents, schools, districts and communities access to the data needed to evaluate performance, plan for the future and celebrate successes. Data Quality Campaign recognized Kentucky's SRC as one of the best in the nation.

### **Next Generation Internet Bandwidth Upgrade for KY K-12 Schools**

KDE staff and AT&T moved KY K-12 schools to a 200 Gbps Internet platform in May. This upgrade provides K-12 students and staff in Kentucky access to a very safe and reliable Internet experience to support direct or distance teaching and learning. The amount of computers in KY K-12 and KDE is 8 times larger than the rest of KY state government and all local county governments combined and thus it should be no surprise given KY is "the" national leader in cloud based computing that we use 20 times more Internet bandwidth than the rest of KY state government and local county governments combined. We know of no other educational entity, worldwide, that has this amount of quality, safe Internet resource to support teaching and learning.

### **Kentucky K-12 Further Commits to Computer Science Growth**

Kentucky continues to lead surrounding states and the nation in its dedication to expanding access to Computer Science (CS) for all students. Kentucky supports more *Girls Who Code* (GWC) clubs and co-curricular groups than any other GWC partner. Kentucky is also one of 18 states with seven or more of the *Nine Policies to Make Computer Science Foundational* for all students. Not even California, who boasts industries of innovation in technology, has met as many statewide CS policies as Kentucky. KDE has added a statewide dedicated K-12 CS Lead to organize professional learning programs for teachers, meet the requirements of the newly signed Senate Bill 193 to report on CS implementation efforts annually, and ensure that Kentucky's graduates compete in the 21st Century workforce. This dedication to CS will not merely guarantee that Kentucky graduates compete in the job market but will also empower them to rout their competitors.

### **Online Registration Available for all KY Schools**

Utilized CARES Act funds to make online registration (OLR) available statewide to help combat the COVID-19 pandemic and ease back-to-school challenges. OLR allows parents and guardians to enroll their child from home, allows staff to process enrollments from home, and eliminates many of the paper forms passed between parents and staff. Infinite Campus worked in partnership with KDE to roll out OLR Prime in an expedited 30-day approach for the 2020-2021 school year.

### **Kentucky Expands KY K-12 Internet Safety Beyond the School Campus**

In response to the COVID-19 global pandemic and due to KY's nation leading digital readiness, Kentucky became the first and only state to leverage Internet Safety technologies on behalf of all schools and districts by expanding the K-12 partnership with Lightspeed Systems to ensure that 100% of all students, teachers, and staff have safe and protected access to internet resources while at school or at home. This statewide implementation helps districts manage

distance learning programs more efficiently while effectively meeting both state and federal requirements as a technology protection measure.

### **Academic Standards Finally Become Machine Readable and Interactive with Interoperability**

Kentucky Academic Standards (KAS) are now available for import into Infinite Campus and other digital platforms. KDE partnered with IMS Global and Infinite Campus to import *KAS to all districts in July 2020*. This interactive digital companion can provide direct support and vital linkage for teachers utilizing features such as progress monitoring, standards-based assignments (grading), and lesson planning in IC.

## **2019**

### **Federal E-rate Rebate Program Maximized**

\$50M applied for by KY K-12 for federal E-rate eligible products and service, which could lead up to \$120M in KY K-12 edtech buying power.

### **KY K-12 Online Testing – High School K-PREP**

Large scale online summative K-PREP testing success of 180,000 tests for 90,000 of KY high school students that goes beyond the 2018 EOC test.

### **School Safety (SB1) Anonymous Reporting Tools for Schools**

Voice and digital anonymous reporting tools mandated in 2019 school safety legislation (SB1) are in place.

### **Kentucky Educator Certification and Ethics System RFI**

Request for Information (RFI) is in place to begin transition for the aging, unsupportable systems with a single, modern, cloud-based solution.

### **Updated KY K-12 Internet Services Capabilities for all 173 KY K-12 Districts**

Using a different approach, upgrade/replace the aged electronics in each of the 173 KY K-12 Internet hub sites in school districts, which help all KY K-12 schools better connect to the existing KDE provided fibered on-ramp service to the Internet (aka, KIH3).

### **New KY K-12 School Report Card (SRC) Suite**

Introduced a new SRC having four components, with the primary focus of providing data that KY K-12 students and parents are most interested in seeing/knowing. The SRC is conveniently accessible through a mobile app and provides data that is easily understood by the average person. The card includes a near real-time portal for students and parents to securely access their current daily info (e.g., grades, academic assignments, class schedule, and attendance) and publicly accessible annual snapshots of school and district-level data.

### **First Academic Standards for Computer Science**

Adoption by KY Board of Education and approved by legislature. Marks the first time academic standards for computer science have been developed and redefines Computer Science education in Kentucky.

### **Technology Competencies as Minimum Graduation Requirement**

Beginning for students entering high school in the fall of 2020, graduation requirements include the ability to demonstrate performance-based technology competencies.

### **Computer Science & IT Academy Launch**

Creation of a joint venture with OET and CTE to support rigorous computer science professional learning for teachers as well as teacher and student course support in the demonstration of computer science standards and industry certification exam vouchers in ALL computer science courses and pathways.

### **Statewide Creation and Expansion of Digital Learning Coach Network**

With further commitment to the OET/ KETS' People Side of K-12 EdTech study, districts across the state began identifying Digital Learning Coaches (DLC) to provide support to administrators, teachers, students and parents and KDE launched the first ever statewide DLC support network. Their focus is to assist teachers in maximizing the effective use of technology for learning, differentiating instruction, and providing rigorous, relevant and engaging learning experiences for all students. Digital Learning Coaches provide a vital, real-time professional learning role for district-by-district customized digital learning experiences design, digital workflows, digital relationships, digital collaboration and student-design digital products (all of which are tied to remote and distance learning). Due to the strength and quickly proven value of this network prior to a global pandemic, district leaders are swiftly tapping more learning leaders to join the KY K-12 DLC Network.

### **Library Media Statewide Leadership Selected**

Kentucky becomes one of only a handful of states to establish a dedicated Library Media leadership role. This new role will continue to push Kentucky K-12 public schools to nation leading boundaries and set new expectations for the role of library media leadership, instructional technologies, literacy, and learning.

### **Record Setting STLP Growth**

The 2019 STLP journey began with 1800 STLP school team projects and close to 60,000 KY K-12 STLP students competing in November and December. Student participation in regional events grew beyond capacity and at such a high rate, a 9<sup>th</sup> STLP regional event was added to accommodate the increased participation in the nation's best and largest Student Technology Leadership Program.

## **2018**

### **Largest Statewide MUNIS Disaster Recovery Test**

Successful completion of first statewide disaster recovery test of cloud-based KY K-12 financial services (MUNIS) used by all school districts.

### **KY K-12 Online Testing – High School End of Course**

Highly successful first, large-scale “field test” of online testing in KY K-12. A total of 131,442 test sessions were administered to 97,747 students representing 169 school districts. This included end of course assessments for grades 9 through 12 in biology, Algebra II and English II.

## **KDE's KY K-12 EdTech presentation to US Congress committee in Washington DC; KY K-12 is the pioneer and overall national leader in most aspects of K-12 education technology**

KDE was chosen by Chief Counsel of State School Officers (CCSSO) to present KY K-12 EdTech successes over the past 25 years and to represent the other 49 states on recommended approaches to K-12 cybersecurity.

## **Statewide KETS Service Desk Reaches Milestone of Service**

Reached major milestone of 250,000 service requests by our in-house, dedicated education technical assistance team to all school districts.

## **2018 – 2024 KETS Master Plan for Education Technology**

This next phase of the Master Plan builds upon the successes of the previous plans back to 1992 and includes items KY K-12 continues to do well, areas to improve upon and new items to be integrated. The studies, research, standards, governance and technology needs for the state and districts that play a critical role in executing the Master Plan are also identified.

## **KY K-12 Email Upgrade/Transition to Microsoft/Google Email**

Based upon feedback from KY K-12 district EdTech leaders, students and teachers, added Gmail as a KY K-12 product standard to our existing KY K-12 e-mail standard of Microsoft Office 365 e-mail for a better experience using Microsoft's Education tools and Google's G-Suite.

Two-thirds of districts chose to upgrade to the current version/design of Microsoft Office 365 and one-third of the districts chose to transition to Google's Gmail.

## **PBS Learning Media Launch**

Created a new partnership between KET and PBS bringing more than 100k standards-aligned video resources free to Kentucky school districts.

## **Data Visualization Tools**

Enhanced the overall value and intuitiveness of the Student Information System (Infinite Campus) through use of interactive data visualizations created in Tableau to provide school and district administrators easier access to real-time actionable data.

## **2017**

### **The People Side of Education Technology**

First in the nation study and tool that addressed the people side of K-12 education technology

### **Infinite Campus Migration to the Cloud**

Partnered with Infinite Campus to add security, improve efficiency and reduce statewide costs by leveraging a private cloud environment for the Kentucky Student Information System

### **School Cloud Firewall**

First in the nation to implement a complete cloud based firewall security service for every school district

### **William T. Nallia Award**

KDE received the William T. Nallia award from the Kentucky Association of School Administrators that reflects a spirit of innovation and cutting-edge leadership while bringing higher levels of success to all children.

**Successful Pilot of Future KY K-12 voice/telephone communications via the cloud by KDE the agency, KSB and KSD.**

### **EdScoop's EdTech Heroes Award**

KDE received the EdTech Heroes Award as one of the top 25 states making a difference in "EdTech Heroes: 25 State Leaders Making a Difference," a project that highlights states that demonstrate innovative practices and leadership in harnessing technology to support education.

## **2016**

### **Creation of OET's Digital Learning Coach Leadership Team**

Designed to support districts through leadership & professional learning as well as resource identification and best practices for implementation of digital learning strategies.

### **Government Technology Magazine's "Doers, Dreamers and Drivers" Award**

KDE named one of Government Technology's Top 25 Doers, Dreamers and Drivers for 2016, for finding innovative ways to cut through public sector barriers to improve and maximize services to the state.

### **STLP on KET's "Education Matters"**

Filmed live at STLP state championship at Rupp Arena, the video highlighted the impact of KETS and instructional technology across Kentucky.

## **2015**

### **KETS Infographic**

An accumulation of education technology data that visually presents important data trends

### **Internet Safety and Content Management**

Established statewide product standard for Internet content management service.

### **Kentucky Information Highway (Version 3)**

First in the nation to connect every school with high speed fiber and meet the national standard of 100kbps for every student

### **Created a National Model with KY's First IT Academy**

Now called Microsoft Imagine Academy, KETS established a new strategy for championing industry recognized IT student certifications.

## **2014**

### **Data Quality Study**

Partnered with Gartner to define best practices for collection and stewardship of education data

### **Non-Traditional Instructional Time Legislation**

All 173 public school districts became eligible to apply to conduct "non-traditional" student attendance days due to weather or other emergencies formerly known as the "Snow Bound Pilot." Approval provided the opportunity to conduct school through virtual or other non-traditional means on days that the district would have normally had to cancel school.

### **Wireless Access on School Buses**

Schools implemented wireless Internet access on school buses to give students access to education technology tools while commuting to and from school.

### **eTranscripts**

First state to use a common transcript and electronic process for college admissions statewide - All public high schools, and both public and private postsecondary schools participate.

### **Recognized as a Top 3 State in Data Quality**

KDE was recognized nationally by the Data Quality Campaign for best practices in data collection and use of educational data to improve student achievement.

### **Single Sign On (SSO)**

First in the country to provide the ability for every student and teacher to access Chromebooks and Google resources via their Office 365 credentials.

## **2013**

### **2013-2018 KETS Master Plan for Education Technology**

The 2013 Master Plan closely aligned with the P-12 education strategic plan of the state and districts, and was further informed by relative studies, research, audit and survey results, and customer feedback. For the first time, the Master Plan was delivered in an online digital format.

### **MUNIS Transition to the Cloud**

First and largest in the nation to provision cloud based financial service for K-12 and any type of government organization

### **BrightBytes Partnership**

BrightBytes helped KDE and school districts better understand, through EdTech data, more about the usage and impact of digital tools and resources for students, teachers and parents.

### **KDE News Mobile App**

KDE and Northern Kentucky University launched the KDE News mobile app for iPhone, Android and Windows devices.

## **2012**

### **First Online Statewide School Report Card**

Kentucky first introduced an online school report card in 2012 that was recognized nationally by the Education Commission of the States as one of eight states with report cards that were accessible, informative and easily understood.

### **First All State Superintendent Webcast**

Commissioner held first All State Superintendent webcast from the State Board Room at the Capital Plaza Tower in Frankfort

### **Paperless State Board Meetings**

The Kentucky Board of Education (KBE) became totally digital for state board meetings.

### **KDE Notify App**

KDE and Northern Kentucky University launched KDE's first mobile app for iPhone, Android and Windows devices focused on the status of education technology services.

KDE shifts virtual high school experience from a state-ran model to a distributed partnership model (naming JCPS eSchool, BAVEL, and KET the original partners).

## **2011**

### **KDE Open House**

Launched as a "one-stop shop" for education data allowing schools, districts, parents, researchers and others access to key data on schools and districts

### **Kentucky Student Information Mobile App**

In partnership with Infinite Campus, launched the first student information system mobile app providing parents and students real time access to assignments, grades, attendance and more - The iOS app was introduced in 2011 and an Android version was available by 2012.

### **Digital Driver's License for Digital Citizenship Launched**

KETS created a partnership with the University of Kentucky's Digital Learning Design Lab to launch an app focused on helping students and teachers learn the nine elements of digital citizenship.

### **First State Board Meeting Webcast**

Kentucky Board of Education (KBE) began to webcast meetings with the first webcast conducted from the State Board Room at the Capital Plaza Tower in Frankfort.

## **2010**

### **Cloud Email**

First and largest statewide implementation of cloud based K-12 email for every student, teacher and administrator

### **KySTE Conference**

KySTE moved its summer conference to the spring in the old Kentucky Teaching and Learning Conference (KTLC) timeslot (previously Kentucky Education Technology Conference/KETC).

## **2008**

### **First Stilwell Award**

KDE instituted the Stilwell Award for those outstanding partners who helped KDE fulfill their mission to the students and citizens of the state. William E. Stilwell, namesake of the KDE Technology Award, was named first recipient.

## **2007**

### **KATC Becomes KySTE**

Kentucky Association of Technology Coordinators became KySTE (Kentucky Society for Technology in Education) and hires first executive director

### **2007-2012 KETS Master Plan for Education Technology**

The 2007 Master Plan described how technology would be used to improve teaching and learning for all of Kentucky's children, building upon past successes and defining a path which

enable all students to understand and leverage technology opportunities to realize their full potential while extending instruction beyond traditional school walls.

## **2006**

### **Instructional Device Upgrade (IDU)**

Legislators appropriated \$50m to replace aging student and teacher workstations.

### **Kentucky Information Highway (Version 2)**

Provided increased high-speed data and Internet capacity for every school and school district office

### **First KY EdTech Leaders Webcast**

Scott County Schools hosted KETS leadership for the first district EdTech leaders webcast. This is a monthly event that has continued since then.

## **2005**

### **First Statewide STLP Championship at Rupp Arena**

Started as statewide celebration and competition of student technology use-- By 2017, attendance has grown to 14,000.

## **2004**

### **Statewide Identity Management Service**

First in the nation to provide enterprise directory services to all schools and districts allowing secure access to the Internet and web-based instructional material

### **Statewide Software Update System**

Provided a uniform and timely method to download and distribute Microsoft software and security updates for all K-12 Windows workstations and servers

### **Statewide Antivirus System**

Provided antivirus licensing and management services for every district and school including all K-12 Windows and Apple computers and servers

## **2001**

### **KETS Phase 1 Completion**

Provided a basic set of administrative and instructional education technology tools for every K-12 classroom, school and district office

### **2001-2006 KETS Master Plan for Education Technology**

The 2001 Master Plan kicked off Phase 2 of the KETS, building on the basic EdTech toolset and focusing on the ongoing costs of maintaining and incremental replacement, the people costs needed, and the concept and value of shared services.

## **2000**

### **Statewide Student Information System**

First in the nation to implement a common statewide student information system

### **Statewide KETS Service Desk**

First in the nation to provide dedicated education technical assistance to all school districts

### **Kentucky Virtual High School Launch**

Every Kentuckian seeking high school level coursework provided opportunity to enroll in for-credit, enrichment or college preparatory classes taught by Kentucky certified teachers and receive credit from their local high school; courses delivered online to schools, homes and other places with Internet access available anytime and anywhere--meeting the needs of students

## **1998**

### **Federal E-rate Program**

Kentucky was the best-positioned state in the nation to take advantage of this new federal funding opportunity because of the state and district education technology plans and existing statewide education technology contracts for eligible components. Kentucky schools have received over \$545 million for telecommunication lines, Internet access and networking components since 1998 and remains among the top states in the nation in E-rate funds received. State level E-rate reimbursements funnel to districts as KETS offers of assistance (where they are matched 1 :1) to support district eligible E-rate services thus creating a unique 3 to 4 bang for the dollar that assist districts' purchase of other instructional technologies.

### **Internet Safety and Security Measures (SB230)**

Internet content safety measures for every school

## **1997**

### **MUNIS a Common Financial System for Every District**

First in the nation to provide those applications deemed most critical: Accounts Payable, Personnel, Payroll, Budget, General Ledger and Purchasing

## **1995**

### **First Microsoft Mail Implementation**

First in the nation to have email capabilities for all students, teachers and administrators

### **Rollout of District Administrative System**

First in the nation to provide a local area network, Internet and office productivity software to every district · Shelby County schools were the first pilot site in 1994-1995.

### **Every School District Connected to the Internet**

First in the nation to connect all school districts to the internet via high-speed network connections provided by the first Kentucky Information Highway Contract (KIH 1)

## **1994**

### **Student Technology Leadership Program (STLP)**

First in the nation to establish and provide a spotlight for students using technology to learn or help their school/community

**Model Districts Selected**

Eight model sites, strategically located across the state, selected to demonstrate how KETS would bring life to the vision of the Kentucky Education Reform Act (KERA)

**First KDE Website**

Created to provide enhanced communications to schools, districts, parents, researchers, other organizations and the general public

**KETS Standardized on Ethernet**

Adopted the Ethernet networking standard over Token Ring as the primary standard for school and district technology networks due to Ethernet components being much more affordable

**1993****Technology Assistance Team**

A Technology Assistance team was established in every geographic region of the state consisting of a KETS Engineer (KE) and an instructional leader. This team played a crucial role in establishing the awesome customer relationship that KDE has with districts today.

**1992****Birth of Kentucky Education Technology Systems (KETS)**

A direct result of the 1990 Kentucky Education Reform Act (KERA), KETS ensured basic and equitable anytime, anywhere, always-on access to instructional and administrative education technology services for all students, teachers and administrators.

**1st Master Plan for Education Technology**

The first Master Plan addressed instructional challenges of the 90's and beyond, as educators prepared Kentucky schools for the great changes to come as the world entered into the digital age.
