RE: Proposal for Environmental Services – Water/Wetland Delineation

Via email: marty.cline@hopkins.kyschools.us

Dear Mr. Cline:

Bacon Farmer Workman Engineering & Testing, Inc. is pleased to provide you with a proposal for the Water/Wetland Delineation for the Southside School project located north of Nortonville, KY. The project site appears to cover approximately 20 acres. Based on an initial review of available mapping, the study corridor appears to have two streams that fall within the western portion of the site. The image below depicts the study area.

SCHEMATIC DESIGN CONCEPT - SITE
17-002

**ADDITION TO SOUTHSIDE SCHOOL
NORTONVILLE**
HOPKINS CO., KY

This proposal includes services for a field delineation of waters and wetlands that will collect the information required for a Preliminary Jurisdictional Determination (PJD) of potential waters/wetlands identified within the study corridor. BFW will provide services including field and office data collection which are required for the Wetland/Stream Delineation of the project site. The delineation will be conducted in accordance with the 1987 USACE Wetlands Delineation Manual and the Regional Supplement to the Corps of Engineers Wetland Delineation Manual: Eastern Mountains and Piedmont Region. The project deliverable will consist of a delineation report including a project narrative, maps, and required data forms, and the report will be suitable for submittal to the USACE with a request for a PJD. A PJD letter issued by the USACE is valid for 5 years.

This proposal does not include time to coordinate the review of the delineation with the USACE. However, this is not anticipated at this time and can be added later if desired. BFW proposes to complete the field assessment and development of the report for a lump sum price of \$5,700. If you agree with these costs, please contact me to prepare the contract for BFW's authorization to proceed. Changes to the report due to significant revisions to the project limits after initial submittals to the Governing Agency will be considered reimbursable expenses per standard rates or negotiated sum. All final drawings will be provided to you in digital format.

If these terms are acceptable, please sign the Authorization to Proceed at the bottom of the page and return. Should you have any further questions please, feel free to contact our office at (270) 443-1995.

Sincerely,

Bacon Farmer Workman Engineering & Testing, Inc.

Susannah Campbell
Environmental Manager
