EDGE COURSE DESCRIPTIONS 23-24

Chefs in Training

Stir up some delicious goodness as you learn cooking tips, terms, and how-to's! We'll make some kid favorites such as chocolate chip cookies, and maybe introduce your taste buds to some new flavors as well! Chefs in training is a great introduction to basic cooking, and is always an Edge Saturdays favorite!

Crazy Contraptions

May the *forces* be with you as you get your creative juices flowing in this class! You will combine the art of invention with the science of simple machines...Rube Goldberg style. Who is he? That question will be answered as you design, build and test your own crazy contraption.

CSI for Kids

Calling all super sleuths! Students will follow clues, collect evidence, break codes, and compare fingerprints to ultimately solve a crime. In the process they will have fun using tools of the trade and learning what it takes to be a Super Sleuth.

Fairy Tale STEM

Once upon a time in a land called Edge, students reimagined solutions to beloved fairy tales using STEM! Jack needs a quick escape down the beanstalk! The 3 Billy Goats need a strong new bridge to safely cross over the scary troll! The 3 Little Pigs need to build a home that the wolf can't blow down! Help us use STEM to give each tale their happily ever after!

Fitness Fusion

Come have some fun with relay races, fun exercises, and making healthy smoothies and snacks! We will be doing exercises to get our bodies energized and after our fun, we will get to relax with a snack and a smoothie! Learn how to make these healthy snacks with simple ingredients! Being healthy isn't hard, you can have fun and learn so much! Can't wait to see you join the fitness fun!

Lego Paradise

Calling all Lego fanatics—join with other kids (and a teacher) who just can't get enough of those addicting, little building blocks! In this class we'll problem solve, design, and create unique structures to do all sorts of crazy things. We will be Lego engineers!

Lights! Camera! Action!

You are the director and we've got your stage ready! Come learn how to create stop motion films, edit in realistic backgrounds using a green screen and edit the final product to look polished for the big screen!

RAD Science

In this class you will get to do some of the coolest experiments EVER! Create your own gel slime and gross out your family and friends; make magnetic putty; separate the iron out of your healthy breakfast cereal; create a multi-layered "liquid rainbow", a bubbling cauldron and much, MUCH, more!

Rap & Shakespeare

Did you know that figurative language is everywhere...including rap music! Shakespeare was an expert at this and even made new words that are still used today. Next time you hear some rap music, maybe you can find Shakespeare's influence.

Rockin' Roller Coasters

THRILLING adventures are coming your way in this class! Do experiments to test tracks, curves, inversions, dips, speed and more while designing and constructing your own roller coaster runs. Next time you are at the amusement park, you will know the science behind the screams! Aaaaaaaa!

Storytellers Seminar

Ready to use your amazing and vivid imagination? We will use lots of creativity to develop and create our very own stories! In this brand-new Edge class, we will learn how to think like writers and put our skills to the test!

Finding Your Zen With Zentangles

Do you ever feel overwhelmed? Do you love art? Zentangles are exactly what you need! Zentangles are an easy-to-learn, relaxing, and fun way to create beautiful, abstract works of art. Get your creative juices flowing while calming your mind and body with some meditative doodling and take home an amazing, original creation that looks like it belongs in a museum!
