# Who is SREB?

What does college and career readiness  
mean to you in your role  
as a board member?

What are the most important skills that all students should have before leaving MCS?

Do you think the programs offered at MCS are aligned to the current labor market demands?

How do we evaluate the programs that  
are in place in MCS?

Evidence of implementation?  
What is our return on investment?

Describe the relationship between the school and community, including business and industry partners?

How does the board support recruiting,  
developing, & retaining personnel?

How does the board monitor and prepare for any changes in enrollment, demographics, or budgetary constraints?

How does the board ensure the facilities in MCS are at a level that elicits pride from the community?
