Re: Request for Mapping Assistance

Dear Chris,

Per your request, Community & Development Services is agreeable to providing assistance to Christian County Public Schools (CCPS) in its upcoming redistricting effort. CDS assistance will include:

- 1) providing and analyzing population data from the 2020 Census (block level) to determine population disparities and needed areas for potential district boundary adjustments;
- 2) preparing draft redistricting maps with corresponding population data for CCPS review and acceptance and providing related consultative services, as may be needed; and
- 3) providing map exhibits and related digital files for the new districts as approved by the CCPS Board.

The services of CDS are advisory only. The cost for the above services is \$2,500.00 and the estimated time for completion is 90 days. If additional services or extended time is requested, we will advise you prior to incurring additional costs.

Should you find this proposal acceptable, please forward an acceptance letter to our office.

Sincerely,

Tom Britton, AICP, CFM
Executive Director
