Board Item Title IX Workshops

**Takeaways to help
Board and Staff**

The Title IX Workshops for the 2023-2024 school year were conducted via webinar on October 24th and October 26th. These workshops are primarily for the benefit of schools being revisited this school year, but also provide valuable information to all schools in regards to Title IX compliance. Due to the geographic location of the schools being revisited for 2023-2024 it was more feasible to conduct these workshops in this manner rather than try and find two locations that would not require an extensive amount of travel on the part of school administrators.

General Commentary

Both workshops/webinars seemed to work well. The webinar format will be used in the future to conduct various meetings with our members.
