CONTINUED GROWTH FOR GARRARD COUNTY SCHOOLS

Over the summer, all schools collaborated to develop shared pacing guides aligned with the Kentucky Academic Standards. Additionally, teachers crafted common unit assessments in line with these standards. The data from these assessments is regularly collected and analyzed during school and district Professional Learning Communities (PLCs) to inform future actions. Daily formative assessments are consistently administered to guide instructional decisions. Monthly learning walks at both the school and district levels are conducted, followed by discussions among administrators to identify trends and areas for improvement. PLCs are oriented towards data, concentrating on enhancing student achievement.
