2024 Kids Read Now Programs

Data Driven, Evidence Based.

Collecting data is one thing, acting on it is another. By continually analyzing participation data and optimizing the program, Kids Read Now is a proven cost-effective means to protect current PK-5 reading gains while increasing readiness for future progress. Students receive a new book in the mail every 8–10 days while parents are coached weekly with title-based reading activities inside each book. They're even encouraged to report their reading progress via text or the Kids Read Now app. More data means better decision-making!

The pandemic and varied remote learning situations have left kids further behind. The KRN Book Bridge program meets the need for a year-round solution to supplement classroom instruction. Each six-week segment provides a simple way to get student-selected, reading level-appropriate, quality books in the hands of students in their homes weekly—and can be renewed for year-round deliveries!

We look forward to partnering with you to improve literacy rates for your PK-5 kids!
