

## **Board Report**

Jim Seward, Director of Technology  
December 2023

### **Field Trip**

The student technology team had an amazing opportunity to visit Hubbard Broadcasting. They were able to see how technology makes radio broadcasting work. I am currently working on our next field trip to CVG Airport to explore technology and air travel.

### **Monthly Support**

We have seen an uptick in the amount of damage being reported by students. Water damage, cracked screens, power cords etc. We are fortunate enough to have a supply of loaner devices to cover these issues.

### **Pod Casting**

I am working with Misty to acquire technology to enable our students to create podcasts. We will be able to create a student station to allow interested students to join the podcasting world. Stay tuned!
