

Christian County Public Schools District Health and Wellness Report

Per KRS 158.856 and KRS 160.345, the district must hold an annual public forum regarding the Health and Wellness District Reports, which were posted to the Christian County Public School's website in November 2023. The reports show the progress of our schools through the Healthy Schools Program online assessment and action plan(s) and help to make data-based decisions to improve school health and wellness.

The Christian County Public Schools wellness policy can also be found on the district's website under Health Services – Wellness Information.
