

TC Energy Build Strong Application

At TC Energy, we believe that creating long-lasting relationships in the communities we call home will help us build a stronger future, together. Through our Social Impact program, Build Strong, we invest in meaningful ways in causes and organizations that create shared value and prosperity between our communities and our business. Whether we're partnering with local organizations, awarding scholarships to future energy problem solvers or encouraging our employees to get involved, we believe that doing good, and doing good business, go hand-in-hand.

Becoming an affiliate of Dolly Parton's Imagination Library has aided us at the Powell County Public Library in establishing an environment in our community centered around the love of books and reading.

It is our goal to provide our youngest community members with age-appropriate reading materials delivered, free of charge, to their homes. We are presently one year into our program and have reached approximately one half of the designated population. Not only do we value early exposure to reading, but we also feel the impact of this program will be evident once the children are older and in school.

At the present rate of enrollment, the estimated cost of our program per year will be approximately \$7,500. The Imagination Library is funded entirely through donations. We have been funded through our first year and are seeking funds to continue our program.

Thank you for your time and consideration.

Sincerely,

Suzy Brown

Powell County Public Library
