

Board Report

Jim Seward, District Technology Coordinator

April 2024

Technology Plans

The technology plans have been submitted to the state. They have also been submitted to our school board for approval.

End-of-year

With our 1-1 program, we are working on updated procedures for device collection. I will be working with building principals to work together to collect devices. Plan is in place and we will adjust and redefine, as necessary.

One-to-One Project

We have ordered 120 student devices, to be used in our 1-1 initiative. These devices will be used for 3-5th grades during the next school year. We are also placing an order to replace the teacher devices for the Grandview School staff.

STLP

We have the honor of having a State STLP Engineer/Ambassador. Skyler Benitez (12) was selected to represent Bellevue. Skyler was able to represent at a meeting with David Couch at KDE, provided support at the KYste conference, and was able to support over 20,000 students at STLP State at Rupp Arena.
