

Board Report

Jim Seward, Director of Technology

May 2024

End-of-year

We are collecting all student and staff devices before the end of the year. We are also imaging new computers to be available for summer school.

New Employees

We have hired Gage Morton as our summer student technician (seasonal position). He will be working closely with our team for the months of June and July 2024. He will be an integral part of getting our district ready for the next school year.

Summer

The Tech Team will be extremely busy this summer. New staff devices at GES, imaging computers and the many other tasks that come with summer break. And we cannot forget the construction projects, to name a few.
