KASA's Education, Law, and Finance Conference

General Commentary

I was asked to speak to members of KASA during their Education, Law, and Finance Conference held at the Lexington Center during the Boys' Sweet 16 on March 22. The focus of my presentation included recent developments in the interscholastic athletics across the country as well as recent case law and legislative changes in Kentucky. There were several people present and the administrators were very engaged as several questions were asked. This event serves as another way for the KHSAA to effectively share its mission with the school community and staff's involvement helps develop positive relationships across the Commonwealth.
