PlayVS is looking to add Chess for the next school year. I think this is a way for us to easily add Chess as an activity (some states offer in person Chess Championships). It is played through chess.com and can be played on any device. We will see what interest there is for it the 24-25 school year (placing it in PlayVS' Regional League). Fall participation in the regional league can help us determine if there is enough interest to add a state championship in the future.
