

Dear Brigid,

We are pleased to offer you this grant for \$1600.00 to support coding and programming at La Grange Elementary School. We are looking forward to hearing about your progress with this project. Thank you for all you are doing to further technology education opportunities for your students.

Please read through the following grant responsibilities and sign your name, certifying you have read to, understand, and agree to the following requirements.

Grant Requirements:

1. I commit to using the awarded funds for the grant's stated purpose above.
2. I commit to providing updates on the use of grant-funded equipment and initiatives. The first update should be within two months of receiving the equipment, independent of school holidays. You should provide subsequent updates at least once per semester for the next two years. These updates should include how you're implementing the equipment, any interesting stories from student engagements, what the kids are building and learning, or anything else noteworthy. You should also include pictures and videos of students interacting with the equipment that we can share on our social media pages to help us gain interest and fund more projects like yours. By providing these pictures or videos to us, you attest that you have the appropriate permission to share them.
3. I commit to providing equitable access to all students and not limit equipment or instructional access to only gifted students or other exclusionary student groupings.
4. As the sponsoring educator, I commit to making a best-effort plan to ensure the equipment will be utilized properly if employment circumstances change. If this is not possible, I will reach out to RTF in an attempt to rehome the equipment or any unspent funds so that they are effectively used.
