Summer School

After collecting devices that were used for the school year, we were able to get the devices cleaned, sanitized and re-imaged for the summer school program.

One-to-One Devices

We are moving our intermediate school kiddos to Chromebooks for the 24-25 school year. All Windows laptops will be in 6-12 student hands. Our goal is to continue to expand Chromebooks each year and eventually phase out Windows laptops (main reason is cost). K-2 will still be on iPads for the coming year.

New Summer Staff

I am thrilled that we have hired Gage Morton to help the Tech Team this summer. Gage has hit the ground running and is doing an amazing job!

Construction

The Tech Team has been working hard to get the classrooms ready for construction. We have covered the displays in heavy duty plastic. We have removed all technology from each room and have stored it in our Tech Offices.
