KMA Sports Medicine Committee Meeting

**Takeaways to help  
Board and Staff**

The semi-annual meeting of the KMA SMAC was held. Most of the issues discussed dealt with the change from the heat index to the wet bulb globe for measuring activity adjustments. With the upcoming TUFFS meeting later in May, that was a critical prep discussion.

**General Commentary**

This committee has finally gotten back into a regular cycle of two to three meetings per year. During the pandemic this group was very important in getting the association data it needed to resume play when it did. They continue to review KHSAA policies for suggestive remedies, and advise of cleanups in student athlete safety preparation. They have already begun discussing the 2025 revision of the Safety Course and have been very cooperative in their discussions around the conversion of the course to the Arbiter platform.
