NIL Panel

Takeaways to help Board and Staff

Am always pleased that our board is so supportive of our initiatives that we are generally far ahead of so many associations, even those with significantly more resources. We continue to review projects and undertakings by other states and are very pleased with where we are. It especially illustrates how we work positively with both our state board of education and our legislature in a cooperative manner and that prevents so many issues.

General Commentary

We are always appreciative of the chance to attend this conference, which in many cases is the best professional development our staff can recieve. No school or school system can trule emulate what we do from our office, and our staff being able to learn and review with peers going through the same situations is key to our continued progress.
