

COMMONWEALTH OF KENTUCKY
COUNTY OF OHIO
SOLAR ENERGY SYSTEM INSTALLATION REQUIREMENTS
ORDINANCE NO. 24-_____

AN ORDINANCE ESTABLISHING LICENSURE REQUIREMENTS AND REGULATIONS
FOR SOLAR ENERGY SYSTEMS IN OHIO COUNTY, KENTUCKY

WHEREAS, pursuant to KRS 67.083, the Ohio Fiscal Court is granted the authority to undertake all necessary governmental actions for the welfare of the county, and specifically is endowed pursuant to KRS 67.083(3)(h) and KRS 67.083(3)(m) for the regulation of commerce for the protection and convenience of the public, and with the power to protect and conserve the county's natural resources, including but not limited to soil and wildlife, to safeguard the livelihoods and well-being of its residents; and

WHEREAS, KRS 278.718 became effective June 29, 2023, and further provides that an ordinance, permit, or license issued by a local government and enacted under the provisions of home rule under KRS Chapter 67.080, 67.083, 67.850, 67.922, 67A.060, 67C.101, and 82.082, shall have primacy over the state provisions, including setback requirements, set forth in KRS 278.700, 278.704, 278.706, 278.708, and any conflict between an order of the board and a local ordinance, permit, or license shall be resolved in favor of the local government's ordinance, permit, or license; and

WHEREAS, the Ohio County Fiscal Court shall consider applications to develop solar energy systems that promote employment and economic development in Ohio County. It is the intent of this ordinance to maintain Ohio County's agricultural and rural character consistent with growth and development that protects and enhances this character. The Fiscal Court shall not approve and solar energy system (SES) that significantly inhibits or disturbs this character or unreasonably diminishes the value of real property, including farmland, residential neighborhoods, single family homes outside neighborhoods, and commercial or industrial properties proximate or adjacent to any proposed SES. Any siting of an SES in Ohio County shall avoid all unreasonable adverse impacts to agricultural land, wildlife and its habitat, forests, wetlands, and historic sites. No SES considered under this ordinance shall include any prime farmland or farmland of statewide importance as defined herein.

Unless otherwise provided in this ordinance, the Fiscal Court shall have sole jurisdiction regarding the siting, development, construction, installation, extension, variance, and decommissioning of solar energy systems in Ohio County, Kentucky.

NOW THEREFORE, BE IT ORDAINED BY THE FISCAL COURT OF COUNTY OF OHIO, COMMONWEALTH OF KENTUCKY:

SECTION 1:
DEFINITIONS

1. **MERCHANT ELECTRIC GENERATING FACILITY** – an electricity generating facility or facilities (except for a qualifying facility as defined in KRS 278.700(7)) that, together with all associated structures and facilities:
 - a. Are capable of operating at an aggregate capacity of ten megawatts (10MW) or more; and

- b. Sell the electricity they produce in the wholesale market, at rates and charges not regulated by the Public Service Commission.
2. **SOLAR ENERGY SYSTEM (SES)** – a device, including its components and subsystems, which collects solar energy for electricity generation, consumption, or transmission, or for thermal applications. SESs are in turn divided into three types depending on how the system is incorporated into existing land use:
- a. **INTEGRATED SOLAR ENERGY SYSTEM (INTEGRATED SES)** – an SES where the solar materials are incorporated into the building materials, such that the building and solar system are reasonably indistinguishable, or where the solar materials are used in place of traditional building components, such that the SES is structurally and integral part of the house, building, or other structure. An Integrated SES may be incorporated into, among other things, a building facade, skylight shingles, canopy, light, or parking meter.
 - b. **ROOFTOP SOLAR ENERGY SYSTEM (ROOFTOP SES)** – an SES that is structurally mounted to the roof of a house, building, or other structure and does not qualify as an Integrated SES.
 - c. **GROUND MOUNTED SOLAR ENERGY SYSTEM, (GROUND MOUNTED SES)** – an SES that is structurally mounted to the ground and does not qualify as an Integrated SES. Ground Mounted SESs are further sub-categorized as follows:
 - i. ***Small-Scale Ground Mounted Energy System (Small-Scale SES)*** – a Ground Mounted SES with a footprint of less than two thousand five hundred (2,500) square feet.
 - ii. ***Intermediate-Scale Ground Mounted Energy System (Intermediate-Scale SES)*** – a Ground Mounted SES with a footprint of between two thousand five hundred one (2,501) square feet and forty (40) acres and which does not constitute a Merchant Electric Generating Facility as provided in KRS 278.700(2).
 - iii. ***Large-Scale Ground Mounted Solar Energy System (Large-Scale SES)*** – a Ground Mounted SES with a footprint of more than forty (40) acres. This term also includes any non-exempt SES that, irrespective of footprint size or configuration, constitutes a Merchant Electric Generating Facility as defined by the terms of KRS 278.700 (2) and is otherwise subject to review and approval by the Kentucky State Board of Electric Generation and Transmission Siting.
3. **FARMLAND OF STATEWIDE IMPORTANCE** means a map unit identified by the National Resources Conservation Service as including soils that nearly meet the requirements for prime farmland and that economically produce high yields of crops when treated and managed according to acceptable farming methods.
4. **PRIME FARMLAND** means a map unit identified by the Natural Resources Conservation Service of the United States Department of Agriculture as having the

best combination of physical and chemical characteristics for producing food, feed, forage, fiber, and oilseed crops and is available for these uses.

5. **DECOMMISSIONING PLAN FOR GROUND MOUNTED SES** – a plan prepared by a licensed engineer that establishes the party responsible for the decommissioning, the anticipated life of the project, the estimated cost for removal of the SES facility, the costs for restoring the land to its original condition, and all other plan information required by this ordinance.
6. **ENLARGEMENT** – to increase the size of an SES footprint or relocate an SES footprint to an area of land not included as part of an original license’s approval or any change which would exceed the scope (increased height or decreased setback or buffer) of the original license’s approval. SES enlargement does not include the repair, modification, retrofitting, or enhancement of a licensed facility provided such repair, modification, retrofitting, or enhancement does not violate the terms of this ordinance or a condition of the license’s approval.
7. **EXEMPT SOLAR ENERGY SYSTEM (EXEMPT SES)** – an SES that is a facility of a municipally owned electric system or public utility regulated by the Kentucky Public Service Commission or Federal Energy Regulatory Commission, which is exempt from planning and zoning requirements under KRS 100.324.
8. **PARTICIPATING PROPERTY** – a property on which a Solar Energy System (SES), as regulated by the terms of this ordinance, is to be constructed in whole or part. This includes any property for which the owner(s) has provided their signature(s) on a written and recorded agreement, explicitly consenting to be a party to the licensure application for the construction of an SES. Such signature(s) shall constitute prima facie evidence of the owner(s)’ consent and/or agreement to any terms set forth in the licensure application, including the waiver of any setback requirements from non-participating properties as subsequently defined herein.
9. **PHYSICAL CONSTRUCTION (SES FACILITY)** – the excavation or movement of earth, erection of forms or structures, or similar activities undertaken in the construction of an SES Facility. This term does not include any activity or construction undertaken prior to the issuance of all required certificates, approvals and permits, if any, as required under KRS Chapter 278 and other applicable state statutes.
10. **RESPONSIBLE ENTITY** – the owner of the Solar Energy System and related improvements irrespective of land ownership by fee simple title, lease agreement, or other instrument. The responsible entity is the applicant under the terms of this ordinance.
11. **SES FOOTPRINT** – an area calculated by drawing a perimeter around the outermost SES panels and any equipment necessary for the equipment to function, such as transformers and inverters. The footprint does not include perimeter fencing or visual buffers, nor transmission lines or portions thereof that are required to connect the SES to a utility or customer outside the SES perimeter.

12. **SETBACK** – the minimum distance established by this ordinance measured from the property line of a non-participating property or boundary of a public roadway or rail-line to the nearest portion of an SES Footprint or other regulated SES feature. The setback distance required by this ordinance is to be contained within the boundary of a participating property and is the minimum distance from a non-participating property or public roadway or rail-line boundary that an SES Footprint or other regulated SES feature is allowed to be constructed.
13. **SITING BOARD REGULATED SES** – an SES that constitutes a “merchant electric generating facility” under KRS 278.700(2), the construction and siting of which is subject to review and approval of the Kentucky State Board on Electric Generation and Transmission Siting.

SECTION 2: APPLICABILITY OF ORDINANCE

1. **APPLICABILITY OF ORDINANCE.** This ordinance and its requirements for licensure shall apply to the siting, construction, installation, enlargement, modification, operation, maintenance, and decommissioning of Intermediate-Scale SES and Large-Scale SES facilities and any new SES within all unincorporated areas of Ohio County, Kentucky. The requirements of this ordinance shall not apply to the following:
 - a. Integrated SES; and
 - b. Rooftop SES; and
 - c. Small-Scale SES.
2. **SES OPERATION.** An SES operation, or which has begun physical construction prior to adoption of this ordinance, shall be considered to have legal nonconforming status in accordance with KRS 100.253.
3. **MODIFICATIONS.** All modifications which increase the Footprint (regardless of size) of any SESs are subject to this ordinance:
 - a. Except *Small Scale Ground Mounted Energy System (Small Scale SES)* which is a Ground Mounted SES with a Footprint of less than two thousand five hundred (2,500) square feet and which shall not increase its Footprint more than five percent (5%) without Fiscal Court approval.
 - b. Except routine maintenance and repair, including replacement of solar panels that do not increase the SES Footprint.
4. **LAWS.** All SESs shall comply with all applicable federal, state and local laws, regulations, permitting and other requirements, and applicable building, fire, electrical and plumbing codes.

**SECTION 3:
APPLICATION PROCESS FOR
INTERMEDIATE- AND LARGE-SCALE SES**

1. **LICENSE REQUIRED AND RENEWAL LICENSE.** Prior to the commencement of physical construction (or at time of effectiveness of this ordinance if undergoing construction) or enlargement of an Intermediate-Scale SES or Large-Scale SES, the responsible entity (applicant) must obtain an Ohio County Solar Energy System License. Additionally, a renewal license shall be required concomitant with the updating of the decommissioning plan, as stipulated below. All applications and supporting documents for licensure shall be submitted by the applicant to the Ohio County Fiscal Court at the Judge Executive's Office for a determination of conformance with the requirements of this ordinance. A request for licensure shall contain the following:
 - a. An application for licensure shall include:
 - i. The name of the applicant and owner(s) of participating property (if different); and
 - ii. The street address and tax map parcel number(s) of the property for which a license is sought to include all participating property; and
 - iii. The current mailing address and phone number of the applicant and the owner(s) of participating property; and
 - iv. A copy of deeds, easements and lease agreements for participating property; and
 - v. A listing of the names, mailing addresses, and property addresses (including tax map parcel number(s)) of all adjoining non-participating property owners to include all owners within two thousand five hundred feet (2,500') of the proposed SES footprint; and
 - vi. A written description of the proposed facility that includes a statement of conformance with the requirements of this ordinance; and
 - vii. The signed statement of the applicant and all participating property owners attesting to the truthfulness and exactness of information supplied in the application; and
 - viii. Any easements proposed with any other property owners including the location, width, parcel number(s) of which easement runs and easement purpose.
 - b. Supplement documents and exhibits that include:
 - i. Ten copies (10) of a site plan, drawn to a scale of no greater than one inch (1") to one hundred feet (100') which illustrates:

1. A vicinity map denoting the location of the proposed facility; and
 2. Property lines of participating properties and adjacent nonparticipating properties, public rights-of-way, and rail-lines within two thousand five hundred feet (2500') of the SES footprint (due to scale, this information may be provided on a separate sheet at a scale of not greater than one foot (1') to three hundred feet (300')); and
 3. Required setbacks with plan notes detailing the minimum distance to be provided from the SES Footprint to the boundary of non-participating properties and public streets and rail-lines; and
 4. Adjoining roads and points of proposed access to the facility; and
 5. The proposed location of all building, panels, invertors, transformers, and other onsite supporting facilities with plan notes detailing the height of such features; and
 6. The proposed location of perimeter fencing with plan notes detailing type, height, and setback; and
 7. The proposed location of the vegetative buffer with plan notes detailing plant type, planting height and anticipated mature height, and capacity; and
 8. Any additional site plan depictions or accompanying descriptions required to determine compliance with this ordinance.
- ii. A decommissioning plan and surety instrument.
- c. **State Approval.** A statement of the proposed Intermediate-Scale SES (if applicable) or Large-Scale SES's conformance (or pending conformance) with the requirements of KRS 278.700 et seq. where the State Board of Electric Generation and Transmission Siting's approval is required.
- d. **Fee Entitlement for Review and Application.** The Ohio County Fiscal Court is hereby authorized to impose a fee of Two Hundred Fifty Dollars (\$250.00) for the review and processing of licensure applications. This fee shall be payable upon submission of a licensure application and is non-refundable.
- e. **Review Timeline.**
- i. Within sixty (60) days of its receipt of a complete licensure application, supplemental documents and exhibits, and fee, the Fiscal Court shall review and recommend that the application for licensure be 1) approved, 2) approved with conditions or required modifications, or 3) denied, with cause stated. Such recommendation shall be recorded in

the minutes of the Fiscal Court. Notification of the Fiscal Court's recommendation shall be provided to the applicant and the Ohio County Judge Executive.

- ii. Within thirty (30) days of receiving a recommendation from the Ohio County Fiscal Court regarding a licensure application, the Ohio County Judge Executive's Office shall:
 1. Issue the requested license with or without conditions or modifications as deemed appropriate,
 2. Deny the license request, providing the cause for denial in writing, or
 3. Remand the matter back to the Ohio County Fiscal Court for additional review and findings. In such cases, the Ohio County Judge Executive shall specify the reasons necessitating further review with particularity.
- iii. Should the matter be remanded, the Fiscal Court is required to re-examine the application and submit a report to the Ohio County Judge Executive within forty-five (45) days of the remand receipt. This report should address the specified reasons for remand and provide additional findings as requested.
- iv. When a license is issued, it shall remain in effect, unchanged, provided the applicant maintains compliance with the terms of this ordinance and the conditions of the original approval.
- v. Upon the issuance of a Solar Energy System License by the Ohio County Judge Executive's Office, it shall be recorded with the Ohio County Clerk's Office to place notice upon all bona fide purchasers for value of the existence of said license.
- vi. In the event of a denial, the County Judge Executive will provide the decision in writing, which shall be sent via certified mail, with return receipt requested, to the applicant and all participating properties and any non-participating properties included within the application. Furthermore, the denial will be published in accordance with the provisions of Chapter 424 of the Kentucky Revised Statutes.
- vii. Any aggrieved party by either the issuance or denial of a license shall have a period of thirty (30) days from the date of the recording of the license or the publication of the denial of said license to file an action with the Ohio Circuit Court seeking judicial review.

SECTION 4: SPECIFIC REQUIREMENTS

1. The following standards shall apply to the siting, construction, installation, enlargement, operation, maintenance, and decommissioning of Intermediate-Scale SES and Large-Scale SES:
 - a. **Setbacks.** The SES footprint shall be setback no less than two thousand feet (2,000') from any non-participating property line and any right-of-way for a publicly maintained roadway or rail-line. Setback provisions cannot be waived by adjacent property owners to whom the property line or residence setback is applicable. Setback provisions requirements may be expanded by the Fiscal Court, as a condition of approval for a Conditional Use Permit, where deemed necessary to assure effective screening.
 - b. **Perimeter Access and Screening.** Access to the site must be controlled by a fence of at least eight (8) feet in height with a vegetative landscape buffer provided between the fencing and the property line. The fence shall be equipped with screening to help shield the facilities and equipment from view. Screening shall consist of:
 - i. An eight foot (8') tall fence and a double row of staggered evergreen trees (minimum five feet (5') in height at planting and maturing to a minimum of fifteen feet (15') in height); and
 - ii. Evergreen trees shall be planted exterior to the fence and shall be setback no less than fifteen feet (15') from any property line; and
 - iii. Screening shall achieve an opacity of ninety percent (90%) to a height of no less than eight feet (8') within three (3) years of planting; and
 - iv. Screening shall be installed within one hundred eighty (180) days of the start of physical construction and shall be maintained until the decommissioning of the SES is completed; and
 - v. All unhealthy, dead, or noncompliant plantings shall be repaired or replaced within ninety (90) days of such occurrence.
 - c. **Signage.** A Ground Mounted SES shall include such signage as is required by law to provide safety information, and other signage as may be allowed under this Ordinance.
 - d. **Protection of Farmland and Revegetation of Disturbed Areas.**
 - i. Any compaction of soils associated with the location of roads and staging areas for Intermediate and Large-Scale Ground Mounted SES on agricultural land shall be minimized to the extend possible and all soils

shall be decompacted as part of the decommissioning process and restored to their original natural contours.

- ii. Upon completion of construction and installation of the Ground Mounted SES, all temporary roads constructed by the applicant shall be removed, and all disturbed areas shall be graded and reseeded with native vegetation in order to establish an effective ground cover and to minimize erosion and sedimentation.
- e. **Lighting.** Lighting of a Ground Mounted SES shall be limited to the minimum necessary for safe operation, and shall be directed downward, incorporate full cut-off features, and incorporate motion sensors where feasible. Lighting shall be designed to avoid light trespass. Nothing in the section is intended to preclude installation of lighting required by the Federal Aviation Administration.
- f. **Installation Insurance.** Proof of adequate casualty and liability insurance covering installation and operation of the SES.
- g. **Erosion.** A description of the measures that will be taken to minimize erosion and sedimentation, and to promptly stabilize and revegetate disturbed areas with native vegetation.
- h. **Decommissioning Plan Required.** The applicant shall be responsible for a decommissioning plan, prepared by a registered by a professional engineer at the expense of the applicant, and updated not less than once every five (5) years, containing the following:
 - i. The anticipated life of the project and defined conditions upon which decommissioning will be initiated; and
 - ii. The estimated decommissioning costs, including removal of the Solar Energy System and related foundations, pads, underground collector lines and roads, transmission lines, and the revegetation and restoration of the property, including soils, to its original condition and all calculations supporting the decommissioning estimate; and
 - iii. The manner in which the project will be decommissioned, including provision and a timetable (such timetable not to exceed five (5) years) for the removal of all structures and foundations, and for the revegetation and restoration of the property to its original condition; and
 - iv. The manner of SES component disposal including the estimated recycled value of components; and
 - v. A copy of any contract containing specific agreements regarding decommissioning.

- vi. If the Ground Mounted SES was permitted use without a conditional use permit, all structures and facilities associated with the SES shall be removed within six (6) months of the beginning of decommissioning. All materials shall be recycled or otherwise reused to the extent reasonably practicable and the disturbed areas shall be reclaimed, revegetated, and restored consistent with this ordinance. All contaminated materials of any type shall be disposed consistent with applicable industry standards and applicable local, state and federal regulations relating to such materials. Under no condition shall such contaminated materials be disposed on-site or burned on-site.

- i. **Surety Instrument Required.** The applicant shall provide a surety instrument in an amount and form acceptable to the Ohio County Judge Executive, upon recommendation of the Fiscal Court, sufficient to cover the costs of decommissioning the SES in accordance with the approved plan in the event the applicant defaults in its decommissioning obligations. The surety instrument shall be provided prior to commencement of construction. Said instrument must be sufficient to defray the costs of completion of the SES or to defray the costs of site clean-up in the event the SES is not completed consistent with its site plan. The surety instrument shall be updated and revised in conjunction with a resubmitted decommissioning plan not less than once every five (5) years. A surety instrument shall be continuously maintained by applicant, their successors in interest and/or assigns, until such time as the Intermediate-Scale SES or Large-Scale SES is decommissioned and all disturbed areas are reclaimed, revegetated, and restored. The form and content of surety shall be in accordance with the requirements of KRS 278.706(2)(m)(5) and shall name Ohio County Government as secondary beneficiary.

- j. For projects with an SES Footprint located within an airport's approach zones or airport imaginary surfaces as defined by the United States Code of Federal Regulations or within one-thousand feet (1,000') of an Accident Potential Zone (APZ 1 or APZ 2), the applicant must complete and provide the results of a glare analysis through a qualitative analysis of potential impact, field test demonstration, or geometric analysis of ocular impact in consultation with the Federal Aviation Administration Office of Airports, the Kentucky Airport Zoning Commission, and the United States Army, Fort Campbell Directorate of Public Works.

**SECTION 5:
DECOMMISSION REQUIREMENT**

- 1. **TIMELINE OF DECOMMISSIONING.** The applicant shall begin decommissioning no later than twelve (12) months after an Intermediate-Scale SES or Large-Scale SES has ceased to generate electricity or thermal energy. All structures and facilities associated with the SES shall be removed within six (6) months of the beginning of decommissioning. All materials shall be recycled or otherwise reused to the extent reasonably practicable and the disturbed areas shall be reclaimed, revegetated, and

restored to like-kind soil quality and overall condition as the areas were prior to the installation of the Intermediate or Large-Scale SES.

2. **FAILURE TO COMPLY.** Failure of the applicant to decommission an Intermediate-Scale SES or Large-Scale SES in accordance with this Ordinance and the approved decommissioning plan shall be grounds for the County to invoke the surety instrument. The County shall be entitled to recover from the surety instrument proceeds that are necessary to complete the decommissioning of the facility. Furthermore, should the costs of decommissioning exceed the value of the surety instrument, the County shall be entitled to recover the excess amount necessary to complete the decommissioning process.
3. **REMEDIES.** A failure to decommission an Intermediate-Scale SES Large-Scale SES as required herein is a violation of this ordinance and is subject to the enforcement and penalties as provided herein. In the event of a failure to perform, default, or failure to extend a surety instrument, the County reserves the right to take all available legal and administrative actions necessary to compel the completion of the decommissioning by the applicant. This includes securing all necessary easements and rights of entry, and/or to recoup any public funds expended by the County in the fulfillment of the applicant's obligation.
4. **LICENSE REVOCATION.** The Ohio County Judge Executive may revoke a license, subject to a 90-day written notice to the applicant, upon the occurrence of one (1) or more of the following:
 - a. The applicant has: 1) provided false or inaccurate information as part of the application for licensure; 2) the false or inaccurate information would result in the sitting, construction, or operation of an Intermediate-Scale SES or Large-Scale SES in violation of this ordinance; and 3) the applicant has failed to correct the violation through the resubmittal of an amended and approvable application and perform any necessary site modification within the 90-day notification period; or
 - b. The applicant has: 1) failed to construct or maintain the Intermediate-Scale SES or Large-Scale SES in accordance with this ordinance and the approved plan; and 2) the applicant has failed to correct the violation within the ninety (90) day notification period; or
 - c. The applicant has: 1) failed to decommission the Intermediate-Scale SES or Large-Scale SES in accordance with this Ordinance; and 2) the applicant has failed to correct the violation within the ninety (90) day notification period; or
 - d. The applicant has: 1) failed to submit an updated decommissioning plan and accompanying revised surety instrument within the five (5) year period as required; and 2) the applicant has failed to correct the violating within the ninety (90) day notification period; or
 - e. The applicant has failed to transfer the license upon change of responsible entity in accordance with this ordinance.

5. **REVOCAION RECORDING.** Any license revocation issued under this section shall be recorded at the Ohio County Clerk's Office. Within ninety (90) days of the recording of a revocation of a license, the Intermediate-Scale SES or Large-Scale SES shall cease operation and, within twelve (12) months thereafter, be decommissioned in accordance with this ordinance.

**SECTION 6:
CHANGE IN OWNERSHIP**

1. **LICENSE TRANSFER.** A change in or transfer of the responsible entity's ownership, as contained on a Large-Scale SES application and accompanying license, shall require the issuance of an amended license which shall be so recorded at the Ohio County Clerk's Office. Any assignment of any interest shall be considered a change in ownership.
2. **RECORDING.** A change in or transfer of the responsible entity's ownership, as contained on an Intermediate-Scale SES or Large-Scale SES application and accompanying license, shall require the issuance of an amended license that shall be recorded at the Ohio County Clerk's Office.
3. **NOTICE AND EXHIBITS.** No later than thirty (30) days following the sale or transfer of an Intermediate-Scale SES or Large-Scale SES, the responsible entity that has or is assuming ownership shall provide written notification to the Ohio County Judge Executive and shall submitted the following information:
 - a. The name and mailing address of the current, licensed responsible entity and license number; and
 - b. The name and mailing address of the responsible entity assuming ownership with proof of ownership; and
 - c. A statement that lease agreements for participating property, if any, are transferable with accompanying documentation; and
 - d. A statement of conformance with this ordinance. If SES enlargement or change to the conditions of the original application (other than ownership) is to occur, a new application as provided in Section 3 is required; and
 - e. A revised surety instrument bearing the name of the new responsible entity.
4. **RESPONSE TO NOTICE AND EXHIBITS.** Within sixty (60) days of receipt of notification, the Ohio County Fiscal Court shall: 1) approve the issuance of the amended license; or 2) deny the issuance of the amended license with cause stated.

**SECTION 7:
MISCELLANEOUS**

1. **DESIGNEE.** The Ohio County Fiscal Court may designate an employee or representative to determine whether the applicant has abided by this ordinance and the applicant shall permit the employee or representative to inspect any property involving its application for inspection during normal business hours (8:00 a.m. to 5:00 p.m.) or at other times agreed to by applicant.

2. **STATE LAWS AND REGULATIONS.** All other state and regulatory laws that are not specifically addressed by this ordinance remain in effect.

2. **SEVERABILITY.** If a provision of this act or its application to any person or circumstance is held invalid, the invalidity does not affect other provisions or applications of the act that can be given effect without the invalid provision or application, and to this end the provisions of this act are severable.

3. **MISDEMEANOR PER DAY OF VIOLATION.** Any person found in violation of this ordinance shall be guilty of a misdemeanor and shall be fined not less than One Hundred Dollars (\$100.00) and not more than Five Hundred Dollars (\$500.00) per violation. Each day of violation shall constitute a separate offense.
