## Benchmark Autos, Inc.

David Biggerstaff

Address : 217 Rockfield Church Road, Rockfield, KY

Phone : 270-427-8691

Benchmark Autos, Inc. and Benchmark Construction, Inc. are owned and operated by David Biggerstaff. David has a civil engineering degree, and has extensive experience in both small and large scale rebuilding, renovation, and construction. His 28 years of experience include thousands of projects, including rebuilding cars, vans, trucks, and campers as well as building homes, pools, and commercial multi-million dollar buildings. He is involved in all projects from start to finish, and has the expertise to design and customize any aspect of a bus retrofit project. His daily work includes all aspects of auto body work - removing and replacing parts, painting, body filler, frame machines, welding fabrication, building, and much more.

Benchmark Autos and Benchmark Construction have done work for individuals, school systems, cities, municipalities, and the University of Kentucky. We have multiple repeat customers, because of the quality of work, and we have become a trusted name in the auto body and construction business. This project requires knowledge in both since it includes replacing flooring, installing awnings, heating and cooling units, and a diesel generator. We have the knowledge, skills, and ability to meet all bid specifications and the stated timeline.

For wrap projects, we partner with Twisted Wraps in Nashville, TN. We will work with Allen County Schools to design and develop the image and will utilize our partners to complete the wrap project. Feel free to visit their website [Twisted Wraps](#) to see their amazing work in detail. They will come to our shop in Bowling Green so the bus doesn't have to be transported to Nashville.

We look forward to partnering with Allen County Schools to design and retrofit your bus to create an engaging Early Learning Bus that will benefit children in your community. We have included a detailed bid, along with images of high-quality sample products, and heavy-duty furniture. We will customize any aspect of the project (colors, furniture, etc.) that align with the pricing of items shown to ensure the final bus meets your needs. We are also open to providing additional options for you, including wrapping part of the interior for a fun, child-friendly environment. For example, the ceiling of the bus could be a blue sky with white clouds. Our priority and commitment is to create a safe, fun, and engaging space for the students in your district and community to enjoy for years to come.
