TOTAL	51

ECE Enrollment Projections for 2025-2026 School Year

We have 6 students that will be transitioning to high school next year and 4 students transitioning to Anchorage from preschool who are already included in the count above. Based on information to date, our ECE enrollment for the 2025-26 school year is projected at 45 students. We currently have 4 students in the referral process to determine eligibility for special education. If these students qualify for special education services our numbers will be 49 for the 2025-2024 school year.
