2024-2025 Phase Two: The Needs Assessment for Schools Understanding Continuous Improvement: The Needs Assessment for Schools

The Needs Assessment Diagnostic will facilitate the use of multiple sources of data to determine the current reality and establish a foundation for decision-making around school goals and strategies. Once completed, the diagnostic will lead to priorities to be addressed in the comprehensive school improvement plan to build staff capacity and increase student achievement. The needs assessment is to be conducted annually as an essential part of the continuous improvement process and precedes the development of strategic goals (i.e. desired state).

While the focus of continuous improvement is student performance, the work must be guided by the aspects of teaching and learning that affect performance. An effective improvement process should address the contributing factors creating the learning environment (inputs) and the performance data (outcomes).

The needs assessment provides the framework for all schools to clearly and honestly identify their most critical areas for improvement that they will address later in the planning process through the development of goals, objectives, strategies and activities. 703 KAR 2:225 requires, as part of continuous improvement planning for schools, each school to complete the needs assessment between October 1 and November 1 of each year and include: (1) a description of the data reviewed and the process used to develop the needs assessment; (2) a review of the previous plan and its implementation to inform development of the new plan; and, (3) perception data gathered from the administration of a valid and reliable measure of teaching and learning conditions.

Protocol

1. Clearly detail the process used for reviewing, analyzing and applying data results as you conducted this year's needs assessment. Include names of school councils, leadership teams and stakeholder groups involved, a timeline of the process, the specific data reviewed, and how the meetings were documented.

PLC leader meetings and faculty meetings of big/picture test results. Break into PLC's and analyze data specific to the curriculum. Planning, Curriculum, Learning Environment (SBDM committees) and Title 1 committee make policy, procedure and curriculum changes based upon the data. All committee reports and decisions are approved by SBDM. Parents and community members are informed at the SBDM

Review of Previous Plan

2. Summarize the implementation of the goals, objectives, strategies and activities from the previous year's Comprehensive School Improvement Plan (CSIP). What was successful? How does it inform this year's plan?

PLC's met bi-monthly to review data and adjust curriculum. They continued to develop standards based assessments and activities as well as align curriculum. As

data was analyzed, adjustments were made. We will continue this process and focus on targeting our disability groups in the areas of reading and math.

Trends

3. Analyzing data trends from the previous two academic years, which academic, cultural and behavioral needs remain significant areas for improvement?

Example of Trends

• The number of behavior referrals increased from 204 in 2022-2023 to 288 in 2023-2024.

• From 2022 to 2024, the school saw an 11% increase in novice scores in reading among students in the achievement gap.

Students with disabilities remains our significant area for improvement. This group consistently performs below proficiency in reading and math. Our most current data indicates that this group is also a significant concern in the are of being academic and/or career ready. We will continue to focus on reading and math as this will also have a direct impact on improving career and academic success. We will continue to use the writing plan/policy we have implemented to sustain our previous writing success.

Current State

4. Describe in narrative form the current state of the school using precise numbers and percentages as revealed by multiple sources of outcome data. Cite the source of data used.

Example of Current Academic State:

• Thirty-four percent (34%) of students in the achievement gap scored proficient on Kentucky Summative Assessment (KSA) in reading. Local benchmark data indicates that thirty-two percent of all students receive Tier II intervention in reading.

• Fifty-four percent of our students scored proficient in math on the KSA compared to the state average of 57%. Local formative assessments show 53% of students are on grade level in math.

Example of Non-Academic Current State:

• Teacher attendance rate was 84% for the 2023-2024 academic year. 2022-2023 Impact survey data shows that 71% of staff feel like they belong at our school.

• Survey results and perception data indicated 62% of the school's teachers received adequate professional development.

Overall our rating was yellow, 60.1 The Proficient/Distinguished scores of the content areas: Reading 58.8%, Math 50.1%, Science, 30.5% Social Studies 54.6%, and Combined Writing 66.4.

Priorities/Concerns

5. Clearly and concisely describe the two or three greatest areas of weakness using precise numbers and percentages.

NOTE: You must thoroughly address these priorities in the Comprehensive School Improvement Plan (CSIP) diagnostic and template.

Example: Students in our gap groups are scoring significantly below all students. Sixtyeight percent of students in the achievement gapscored below proficiency on the Kentucky Summat gap learners.

For the school year 23-24, one of the gap groups (special education) scored significantly lower in transition readiness compared to the general education students at CHHS. Our special education group scored 71.9 compared to general education group who scored 98.2.

Strengths/Leverages

6. Plainly state, using precise numbers and percentages revealed by current data, the strengths and leverages of the school. Explain how the school will utilize the strengths and leverages to improve areas of concern listed above.

Example: Reading achievement has increased from 37% proficient to its current rate of 58%. The systems of support we implemented for reading can be adapted to address our low performance in math.

Non Academic- For school year 24-25 we have started a name and claim system to reach all students. The priority is to ensure all student have an stronger personal connection with an adult in the building.

Evaluate the Teaching and Learning Environment

7 . Consider the processes, practices and conditions evident in the teaching and learning environment as identified in the six Key Core Work Processes outlined below:

KCWP 1: Design and Deploy StandardsKCWP 2: Design and Deliver InstructionKCWP 3: Design and Deliver Assessment LiteracyKCWP 4: Review, Analyze and Apply Data ResultsKCWP 5: Design, Align and Deliver Support ProcessesKCWP 6: Establish Learning Environment and Culture

Utilizing implementation data, perception data, and current policies and practices:

a. Complete the Key Elements Template.

• b. Upload your completed template in the attachment area directly below. <u>ATTACHMENTS</u>

Attachment Name

CHHS Key Elements Chart

8. After analyzing the Key Elements of your teaching and learning environment, which two or three processes, practices or conditions will the school focus its resources and efforts upon in order to produce the desired changes?

Note that all processes, practices and conditions can be linked to the six Key Core Work Processes.

NOTE: The Comprehensive School Improvement Plan (CSIP) diagnostic and template must thoroughly address these.

Design and Delivery Instruction #2 Walkthroughs, lesson plans, processes used to select materials and programs, teachers post learning targets, students and teachers work together to set learning.

Review, Analyze and Apply Data #4 Scheduled time for PLC, PLC minutes/agendas, PLC Leader meetings, KSI/MTSS committee meetings, Planning Committee

Design, Align and Deliver Support #5 PBIS, data from multiple assessments, PLC work, PLC leader meetings, professional development, SBDM, SBDM sub committees and YSC.
