Re: Maryville Elementary- Professional Development- Two Chicks and Arithmetics

During the 2024-2025 school year, Maryville Elementary teachers will be collaborating with Two Chicks and Arithmetics. The following details what they will do.

Mathematical Walkthroughs

- Observations are done to ensure the implementation of practices like setting clear learning goals, facilitating meaningful discussions, and promoting problem-solving skills, ultimately fostering student understanding and engagement in the mathematics classroom. This is then used to guide next steps in improving math teaching.

Instructional Process

- Grades 4-5 Deconstruct the standard into specific, measurable learning targets by identifying key concepts, learning progressions, and prerequisites. Create clear success criteria that align with these targets, using student-friendly language and observable outcomes, along with examples. Design common formative assessments (CFAs) that target these goals, vary in format, and provide immediate feedback to monitor progress and address gaps.

Modeling Lessons

- Grades 4-5. The Coaching Process is a structured approach to professional learning helping teachers improve their teaching practice. The process includes modeling, observation, feedback, and reflection.
- The Two Chicks will model how to effectively ensure a lesson is meeting the depth and rigor of the standards, scaffolding strategies, and assessment alignment. This process supports teachers at all stages of their careers, from novice to experienced.

Co-Teach Lessons

- Grades 4-5. Co-planning and co-teaching math lessons involve collaborative efforts between teachers and the Two Chicks to design and implement effective instructional strategies. This approach promotes shared expertise, maximizes student engagement, and enhances learning outcomes.
