

Board Report
Jim Seward,
Director of Technology
June 2025

Device Collection

This was probably our best year in getting devices returned. Previous years we have had double digits in non returns. Last count, we are less than 6 devices and working to recover those.

Summer School

We have deployed our new Chromebooks to our summer school students. We are using this opportunity to test the devices before the 25-26 school year. To date, many positive comments have come from the students and teachers.

One-to-One Devices

The 25-26 school year will have a different feel for technology. Students in K-1 will continue to utilize iPads. Students in grades 2-12 will now be utilizing Chromebooks. We are looking forward to a successful year.

New Device Filtering

The State of KY has chosen Go Guardian as our new platform for internet content filtering. We are currently working to get this platform up and working for all of our devices. We are planning to have a live date of June 20, 2025.
