

Traceable Communication Platform(s) Update:

Background: The district is seeking to update its list of approved platforms for two-way digital communication between school employees or volunteers and students to ensure secure, traceable, and compliant interactions. The current approved platforms are being reviewed to incorporate new, secure technologies that support effective communication while maintaining student safety and privacy.

Recommendation: The administration recommends the approval of **GoGuardian** as an additional, approved platform for two-way communication.

Rationale: GoGuardian provides a secure and traceable communication environment that aligns with the district's policies on digital correspondence with students. Its features allow for monitoring and archival of communications, which is crucial for maintaining transparency and accountability.

Action Requested: The board is requested to approve the addition of **GoGuardian** to the list of approved platforms for two-way communication between school employees or volunteers and students.
