Product/Service	Description	Qty.	Unit Price	Total
Tree Removal	Remove (2) sweetgum and (2) oak. Left side oak and sweetgum: The school has already removed large dead sections of the trees, but the decline is ongoing. Due to the progressive decline and increased maintenance burden, removal of both trees is recommended to eliminate hazard risk and reduce liability. Right side oak and sweetgum: Heavy equipment used during recent construction activities was parked in close proximity to these trees, raising valid concerns about soil compaction. Compacted soil reduces pore space, inhibits root growth, and can lead to delayed stress symptoms over time.	1	\$12,370.00	\$12,370.00
Stump Removal	Grind 4 stumps in courtyard in front of school.	1	\$1,900.00	\$1,900.00
Remove grindings and planting	Remove grindings and plant 4 green giants. This would include topsoil installation for the new trees as needed, as well as installation of four green giant arborvitae 7 to 8 ft height. This does not include any lawn renovation work, but includes everything necessary to remove chips and install the new trees.	1	\$2,370.00	\$2,370.00
