

Board Report

Jim Seward, Director of Technology
October 2025

Student Technology

We continue to see great success with the Chromebooks in grade 6-12. This is a great indicator on future technology purchases.

We are seeing a reduction in student device damage. A sign that we are hopeful will continue to last throughout the year.

Construction

I am excited that we are starting to see some of the major construction projects come to completion. I can't wait to get all of the technological components up and running to make it even better.

E-Rate

All projects submitted for this cycle have been approved! I am working to set up purchases, installs and configurations. We will have new data closets throughout our district. New network equipment. This will include new wireless connectivity for all campuses.
