

## **Teaching and Learning**

### **11-24-25**

We have completed the on-boarding process with the College Board for SAT in the district. It will be a different experience. There will be reading and math sections, with science and social studies content incorporated.

The KSA results were received and we have spent a great deal of time disaggregating the data. Overall, I think we can be pleased in the district. We certainly can celebrate the high school for a three year run at blue status – that will be difficult to match.

We have developed an advanced coursework policy that is required to be in place by December1. This was mandated in the 2025 legislative session.

CSIP/CDIP processes has entered phase 3. The trauma plan, safety report and the needs assessment have been completed. The next benchmark date is January 1, for the CSIP/CDIP submissions.

We are fast approaching the mid-year break, which means we are fast approaching what we always consider our intense instructional window. With cooperation of mother nature– which seems to be a little dicey right now– we hope to hit a strong stride going into the spring.
