

Board Report

Jim Seward, Director of Technology
December 2025

Wireless Upgrade

We have completed our wireless upgrade for the district this month. We have updated density and more access options for guests to our district. We will be adding wifi to our new concession area and football field soon.

Monthly Support

We have seen an uptick in the amount of damage being reported by students. Water damage, cracked screens, power cords etc. We are fortunate enough to have a supply of loaner devices to cover these issues.

Network Upgrade

We will be upgrading our core networking equipment over Christmas break. This will provide better throughput, management and security of our network.
