Unless otherwise noted above by site, the AMK Services proposal is based on the following assumptions:

- There are existing cable paths for the service antennas.
- The owner of the building in question will allow the least cost and most direct route with respect to cable routing and antenna placement.
- Site access is adequate for the delivery trucks that will travel to site.
- AC power is available at the installation point for the BDA.
- AC power is available at the installation point for the remote fiber hubs
- Adequate HVAC is available for equipment.
