Change Order

PROJECT: (Name and address)
Hopkins County New Board Office
2135 North Main Street
Madisonville, KY 42431

OWNER: (Name and address)
Hopkins County Board of Education
230 South Seminary Street
Madisonville, KY 42431

CONTRACT INFORMATION:
Contract For: General Construction
Date: 02-21-2025

ARCHITECT: (Name and address)
Sherman Carter Barnhart Architects
PLLC
144 Turner Commons Way Suite 110
Lexington, KY 40508

CHANGE ORDER INFORMATION:
Change Order Number: 005
Date: 01-06-2026

CONTRACTOR: (Name and address)
CH Garmong and Sons, Inc.
3050 Poplar Street
Terre Haute, IN 47803

THE CONTRACT IS CHANGED AS FOLLOWS:

(Insert a detailed description of the change and, if applicable, attach or reference specific exhibits. Also include agreed upon adjustments attributable to executed Construction Change Directives.)

Additional concrete testing due to low cylinder breaks.

The original Contract Sum was	\$ 3,662,016.00
The net change by previously authorized Change Orders	\$ 154,352.92
The Contract Sum prior to this Change Order was	\$ 3,816,368.92
The Contract Sum will be increased by this Change Order in the amount of	\$ 6,085.70
The new Contract Sum including this Change Order will be	\$ 3,822,454.62

The Contract Time will be increased by Twenty-Eight (28) days.

The new date of Substantial Completion will be 04-19-2026

NOTE: This Change Order does not include adjustments to the Contract Sum or Guaranteed Maximum Price, or the Contract Time, that have been authorized by Construction Change Directive until the cost and time have been agreed upon by both the Owner and Contractor, in which case a Change Order is executed to supersede the Construction Change Directive.

NOT VALID UNTIL SIGNED BY THE ARCHITECT, CONTRACTOR AND OWNER.

Re: Hopkins County School Board Remodel – ***Concrete Testing Verification***

Mr. Chris Jones,

Garmong Construction Services is providing this letter and subsequent attachments for your review regarding additional work completed for the subject-referenced project. On 8/14/2025, we issued a “Notice of Schedule Delay” letter which details the project impact. Below we have included the final calculation of the project schedule delay and associated cost impact as a result of this change. Please let me know if there is any additional information you feel is necessary to complete your review.

Additional work items included in this change:

- Windsor probe concrete testing
- Excavation to expose foundations
- Concrete foundation core cutting, testing, and grout filling
- Foundation backfill
- Extension of project General Conditions

Schedule Impact for this change: **(28) calendar days**

- Our original substantial completion date was 3/1/2026. Our current substantial completion date of 3/15/2026 was outlined in a previous request for extension. Our new substantial completion date as a result of this change is 4/12/2026.

Cost Impact for this change: **\$29,473.12 ADD**

Please incorporate the above schedule and cost changes into the upcoming contract change order. Please don't hesitate to contact me should you wish to discuss these items further.

Respectfully,

Project Manager

Re: Hopkins County School Board Remodel – **Notice of Schedule Delay**

Mr. Chris Jones,

The executed agreement between C.H. Garmong and Son, Inc. and Hopkins County School Board dated February 21, 2025 lists a substantial completion date for the project of March 1, 2026. The letter dated July 7, 2025 issued by Garmong requested (14) additional days on our schedule due to differing site conditions encountered when installing new foundations for the addition. This change resulted in a new substantial completion date of March 15, 2026.

On July 16, 2025, Garmong received a 7-day concrete test report from the testing agency BFW for concrete placed on site 7/9/25 which indicated concrete strength in the test cylinders collected from the concrete truck did not meet expected strength of the approved mix design for the 7-day break. Additional concrete test reports were issued to Garmong soon after indicating various other test cylinders for previous concrete pours were below expected strength at the 28-day break. With this information, we could not proceed with our planned sequence of work until further verifications could be performed.

As a next step, Garmong engaged an engineering & testing agency to evaluate strength of the concrete placed on site for these locations. The locations included building foundations, column piers, and spread footings. On August 9, 2025, core samples were extracted from these locations and transported to a certified laboratory for testing. The laboratory testing resulted in satisfactory strengths for the approved mix design. As a result of these verifications, Garmong can continue with our planned sequence of work. Please reference the attached laboratory report from the testing agency for additional information.

Due to this unexpected impediment to our work, it is no longer possible to maintain the scheduled rate of progress because the work sequence affected falls along the critical path. Our inability to perform as scheduled and sequenced will necessarily affect completion of the project. Attached is a timeline detailing the sequence of tasks, subsequent testing, and information related to this impact.

C.H. Garmong and Son, Inc.
4117 N. St. Joseph Ave.
Evansville, Indiana 47720
Phone (812) 214-4698 Fax (812) 401-1212
www.garmong.net

Due to the circumstances described above, we request an extension of contract time for each day of this impact. Further, we intend to formalize a request for additional compensation relating to the additional testing and extended overhead costs for this delay.

Respectfully,

Alex Blanford
Project Manager

Re: Hopkins County School Board Remodel
CHG_Concrete Testing_Delay_Schedule Delay

Concrete Testing_Delay_Timeline

- June 27, 2025 – Garmong poured concrete for Spread Foundations starting at column line C.12/1.2 and continuing clockwise to column line E.15/1.2
- June 27, 2025 – BFW provided an observation report for concrete placement Continuous and Spread Foundations starting at column line C.12/1.2 and continuing clockwise to column line E.15/1.2, which indicated proper placement of concrete
- June 30, 2025 – BFW provided an observation report for collecting concrete cylinders from previous concrete pour indicating cylinders appeared to be unmoved and in good condition
- July 3, 2025 – Garmong poured concrete for Continuous and Spread Foundations starting at Column Line F/1 and continuing clockwise to Column Line C/1
- July 3, 2025, – BFW provided an observation report for concrete placement Continuous and Spread Foundations starting at Column Line F/1 and continuing clockwise to Column Line C/1, which indicated proper placement of concrete
- July 4, 2025 – BFW performed laboratory compression testing for concrete placed on 6/27/25, which resulted in satisfactory compressive strength at (7) days
- July 9, 2025 – Garmong poured concrete for Piers at Column Lines 0.1/C.12, 0.1/C.14, 0.1/D.12, 1.1/D.12, 1.1/D.14, 0.1/D.14, 0.1/E.13 & 0.1/E.15 and Spread Foundations at Column Lines 2/C.15, 2/D.14, and 2/E.13
- July 9, 2025, 2025 – BFW provided an observation report for concrete placement Piers at Column Lines 0.1/C.12, 0.1/C.14, 0.1/D.12, 1.1/D.12, 1.1/D.14, 0.1/D.14, 0.1/E.13 & 0.1/E.15 and Spread Foundations at Column Lines 2/C.15, 2/D.14, and 2/E.13, which indicated proper placement of concrete
- July 10, 2025 – BFW performed laboratory compression testing for concrete placed on 7/3/25, which resulted in satisfactory compressive strength at (7) days
- July 11, 2025 – Garmong poured concrete for East Exterior Stem Wall
- July 11, 2025 – BFW provided an observation report for concrete placement East Exterior Stem Wall, which indicated proper placement of concrete
- July 14, 2025 – BFW provided an observation report for collecting concrete cylinders from previous concrete pours indicating cylinders appeared to be unmoved and in good condition
- July 16, 2025 – BFW performed laboratory compression testing for concrete placed on 7/9/25, which resulted in unsatisfactory compressive strength at (7) days
- July 17, 2025 – Garmong provided batch tickets/ weights along with QC data from Meuth (concrete supplier) showing historical data of satisfactory compressive strengths of approved mix design
- July 17, 2025 – Garmong and BFW discussed possible nondestructive testing
- July 18, 2025 – BFW performed laboratory compression testing for concrete placed on 7/11/25, which resulted in substandard compressive strength at (7) days

Project:

Hopkins Co. Board Office Addition & Renovation
Madisonville, KY
A&W Project: TE25058

Hopkins County

In response to the request of Garmong, our Senior Technician arrived at the above referenced site to collect cores completed by ABC Cutting on August 9th, 2025. The core locations were previously determined by others. An approximate location of the cores can be seen on the attached boring location plan. The cores were trimmed, grinded to specification tolerances, and stored in accordance with ASTM C42/ACI 318.

Compressive strength testing was then performed on the cores between 06:00am and 08:30am on Tuesday April 12th, 2025. The results of the compressive strength testing is summarized on the tables below.

If you have any questions concerning this report, please contact us at your convenience.

Respectfully Submitted,

ALT & WITZIG ENGINEERING, INC.

Project Engineer: Logan M. Folz

6/27 Pour Summary

Core #	Average Length After Trimming and Grinding (Inches)	Average Diameter After Trimming and Grinding (Inches)	Measured Compressive Strength (psi)	Break Type
