Winter Swimming

**Positive Developments
and Highlights**

All swimming and diving region meets were successfully completed, even though several had to be rescheduled due to weather. Our region hosts worked closely with our office to ensure that travel plans and the safety of our member schools remained the top priority while adjusting those dates. The six-dive format worked well at the regional level, and we have a full field of divers qualified for the state meet this year. The first round of the state swimming competition also wrapped up last weekend. We'd like to thank Bowling Green High School, Trinity, the University of Louisville, and Scott High School for once again serving as great host sites this year for state first round swimming.

**Championship
Update/Review**

The state swimming and diving finals will be held this weekend, February 20–21, at the University of Kentucky. UK has a great facility for this event, and we're excited to return there once again. The boys will compete on Friday, followed by the girls on Saturday.

**Noteworthy Changes /
Anticipates Changes**

We are bringing a full field of 40 boys and 40 girls divers to the state meet for the first time since 2023.
