

## **Additional Information**

Bid does not include athletic field area. However, I have personal experience of mowing athletic fields etc. If services like mowing and lawn applications are requested for this area; I will be happy to discuss and price.

Your seasonal cutbacks for ornamental grasses, lirioppe, and other perennials has not been completed. I would use the "seasonal cutbacks" service prior to mulching. This is typically done in the fall.

On mulch, there are 2 different varieties mixed together. There is hardwood mulch and some cedar mulch. It is mixed in and looks less than desirable. I would suggest using the dyed black hardwood mulch for color longevity and lower price point. I would usually request a separate work order to remove some of the cedar mulch prior to new mulch installation. However, in wanting to establish our business relationship and to show we pride ourselves on quality, I will have some removed prior to mulching if awarded contract.

Feel free to reach out with any questions, comments, or changes that you would like to make.
