Hopkins County Career & Technology Center  
Attn: Jason McKinney  
Madisonville, KY 42431

Dear Mr. McKinney,

Please accept this letter as formal notice that Haas Factory Outlet (HFO) Midwest is the sole and exclusive distributor of Haas CNC Machine Tools and any associated factory certified service for the State of Ohio, Kentucky & West Virginia.

Furthermore, Haas Automation, is the sole source providing the following to our educational partners.

- 15% in-kind educational discount (not available on the EDU models)
- 2-year Extended Warranty package
- A Haas simulator at no cost for all machines purchased (must order specific options on EDU machines to get free sim.)

There are additional characteristics that position us as a unique provider within the educational market including:

- **HTEC Network** – We have established a community that enables manufacturing educators to share technical information and best practices at both regional and national conferences. HTEC members can contact, collaborate, share and network with over 1800 schools, colleges and universities. Membership is free for all educational institutions and fees are waived for educators for all regional conferences.
- **Gene Haas Foundation** - The purpose of the Gene Haas Foundation is to fund student costs in machining and advanced manufacturing pathways. The funding from our foundation can be used to provide scholarship funding for students pursuing CNC machining, to provide students with the opportunity to achieve NIMS credentials and to promote a competitive spirit with students in machining programs (SkillsUSA & FIRST Robotics). To date the Gene Haas Foundation has provided over \$2.7 million in funds to Kentucky Schools and \$125 million throughout the U.S.A..
- **HTEC Teacher Training** - This hands-on program is provided at four colleges throughout the US. A great way for your instructors to work with our amazing team to build new and innovative skills for teaching CNC. Teacher training is generally less than one week and the Gene Haas Foundation provides scholarships to cover 75% of the tuition for these programs.

Please contact me if I can provide any additional information.

Philip Haming  
Sales Engineer
