Proposal for a new Rational iCombi Pro Oven

I am requesting to replace one of three ovens in our kitchen. This oven has been in service for 16 - 18 years and has begun to have a lot of wear and tear. Two of the ten shelves have broken, so the capacity for cooking larger quantities is diminished by 20%. The door seal has been replaced several times and is needing to be replaced again. We have also had days that it took twice as long to cook items than it should, which also affects our ability to accommodate feeding 500 students in two hours.

Thank you for your consideration on this proposal
