- (3) Provider further acknowledges and agrees to have a written incident response plan that reflects best practices and is consistent with industry standards and federal and state law for responding to a data breach, breach of security, privacy incident or unauthorized acquisition or use of Confidential Data or any portion thereof, including personally identifiable information and agrees to provide the Board, upon request, with a summary of said written incident response plan.
- (4) The Board shall provide notice and facts surrounding the breach to the affected students, parents or guardians, or staff, as applicable.

NON-COMPETITIVE DETERMINATION EXPLANATION

Describe how you determined that competitive vendor selection is not feasible?

Documentation requirement for all noncompetitive D&F transactions, including contracts and purchases of products at any dollar amount: Requisitioner must document how they determined that the vendor qualified for noncompetitive purchasing. This explanation may include documenting the efforts to find other vendors who provide a similar service/product and/or a list of services/products reviewed and the specific attribute that made the selected service/product distinctly different. This documentation must be attached to contracts during the routing process and attached to the requisition for purchases of all services/products using noncompetitive purchasing.

Requirement for all purchases of \$50,000 or more: Requisitioner must include evidence of cost center approval. This may be accomplished by attaching the Requisition to Purchase form to the Munis requisition or by attaching an approval email from the cost center head. Document negotiation efforts to receive the best price for the service/products being procured.

What specific criteria/criterion is/are necessary for this product or service?

In JCPS, our training and professional growth management needs are twofold. First, we are in need of a learning management system to house trainings for staff to review and complete mandatory trainings required by local and state policies. The LMS can also hold other on-going custom trainings that support staff professional growth. Secondly, our district is in need of a professional development tracking system to track professional development hours for teachers, instructional assistants, and other PD earning staff; as well as, administrators. This leg of the system should allow staff to review, schedule, and sign up for trainings pertinent to various role groups as well. Once trainings are completed, the appropriate hours are added to their individual user profile. Teachers are provided with 24 hours of professional development annually and instructional leaders earn 21 EILA hours annually (per state policies 704 KAR 3:035, 156.101, respectively). Site supervisors should be able to review staff completions to ensure compliance with local and state requirements.

What steps did you take (i.e. research) to determine this was the only vendor available?

Over the course of 4 years, PDL has explored other PD tracking and LMS systems that may fit our needs. We explored 3 alternatives. One alternative was Powerschool, but there was an additional charge for customization within the LMS library. Our other options were Mobilemind and Kickup. Both are user-friendly, with features utilizable by JCPS staff. However, we recommend continuing our services with Scenario Learning for the LMS & PD tracking platform for data congruency and to maintain consistency for JCPS staff. We have currently utilized this platform for 4 years. Previously, we used a custom-build platform-pdCentral. In 2022, when we onboarded Scenario Learning, only ten years of historical data was transferred. The PDcentral data is not entirely congruent with the data within Scenario Learning. As a result, it is difficult to gather/analyze historical trend data around PD and to get detailed information around previous PD sessions held in JCPS. Should we adopt a new platform, we will face the same data congruency issues. A second reason for maintaining the current services with Scenario Learning is continuity for the end user.
