

# DAYTON INDEPENDENT SCHOOLS

Technology Update  
April 2026

- The GoTo phone system migration is completed. This new phone system will save the district approximately \$1200 a month on phone services. The Daycare internet service is active and the daycare has a phone from the new GoTo system. This is another cost savings for the phone line but not as much as we are paying \$60 per month for the internet service. But, we get additional options - ie remote access to a camera system if we install it at the bus depot.
- We are moving to Chromebooks at the middle school. With the cost of student and staff instructional devices going up, we have to find a way to save money. The Chromebook is a cheaper option that still provides the students a device for the instructional platforms that we utilize. We will move into the high school with Chromebooks in a couple years.
